PREFACE

Jamaica conducted its Fourteenth Census of Population and Housing in 2011. Under the provisions of the Statistics Act, the Statistical Institute of Jamaica (STATIN) is vested with the authority to conduct any census in Jamaica. The census plays an essential role in all elements of the national statistical system, including the economic and social components. Census statistics are used as benchmarks for statistical compilation or as a sampling frame for household sample surveys. The national statistical system of almost every country relies on sample surveys for efficient and reliable data collection. Without the sampling frame derived from the population and housing census, the national statistical system would face difficulties in providing current reliable official statistics.

While recognizing the importance of the census however, countries are faced with serious resource constraints. Census taking in Jamaica faces not only the challenge of limited resources but an apathetic public which views official data collection with suspicion and even hostility. Despite a vibrant publicity programme for Census 2011, the level of cooperation particularly in some urban centres was disappointing. Worker attitude also presented problems as in a number of cases workers had to be relieved of their duties due to poor and or unproductive work. There was not always sufficient recognition of the fact that remuneration was for work done.

The processing of the census returns is a massive undertaking for which STATIN sought to utilize modern technology for this phase. The data processing of the questionnaires was outsourced to XSOMO International Ltd., who was required to produce the electronic data in a database format and images of the questionnaires. Scanning of the forms which began in June 2011 ended on January 31, 2012. The data editing and cleaning were done using software developed internally and shared via the intranet. The validity and consistency checks which follow will continue until a full and clean database is produced. As the process continues, reports on those topics for which checks are completed, will be produced. At a later date, The Statistical Institute will entertain requests for unpublished data according to stipulated procedures and conditions.

This report is one in the series of subject reports which will provide tabulations based on the specific topics covered on the census questionnaire, at varying geographic levels. This report presents tabulations on School Attendance and Educational Attainment for all parishes.

Among the reports to be published is a separate report for each parish which brings together tables on all topics in one volume.

The 2011 Census Subject Reports to be published (not necessarily in the order listed) are as follows:

- Volume 1 - General Report
- Volume 2 - Age and Sex
- Volume 3 - Disability
- Volume 4 - Education
- Volume 5 - Birthplace, Residence and Internal Migration
- Volume 6 - Ethnic Origin and Religious Affiliation

- Volume 7 - Marital and Union Status
- Volume 8 - Economic Activity
- Volume 9 - Fertility and Mortality
- Volume 10 - Housing
- Volume 11 - Living Arrangements and Household Relationships
- Volume 12 - Miscellaneous

This Report has been prepared within the Division of Censuses, Demographic and Social Statistics by Dr. Valerie Nam, Demographer assisted by Miss Philone Mantock, Senior Statistician and Mr Kenardo Williams, Editor.

Carol Coy
Director General
April, 2013

ACKNOWLEDGEMENTS

The Statistical Institute of Jamaica on behalf of the Government of Jamaica, adopts this medium to express its sincere thanks to the people of Jamaica for their cooperation in the 2011 Population and Housing Census.

As is expected in any national undertaking of this magnitude and complexity, a large number of individuals and organizations, both government and non-government, have participated in its planning and execution. Their contribution is hereby acknowledged.

Collaboration and cooperation at the regional level has been a feature of Caribbean Censuses for decades and for this census, CARICOM through the Regional Census Coordinating Committee, provided valuable support. The financial support from The United Nations Population Fund (UNFPA) for the publicity programme is hereby acknowledged.

The members of the Technical Committee; representatives from the University of the West Indies, the Planning Institute of Jamaica, the technical specialists from the Ministries of Health, Education, Housing and The Environment, Transport and Works, all contributed to the technical deliberations.

The publicity programme gained valuable assistance from Mr Curtis Myrie of Ideal Promotions. XSOMO International Limited undertook the printing of the questionnaires and also had the responsibility for the electronic capture of the information from the questionnaires. STATIN would like especially to recognize Mr. Errol Anderson and the XSOMO team; Mr Neil Williams, Miss Cara Murray, Messers Douglas Aris and Andrew Wilkinson and Miss Jascith Riley. W and S Printing Services provided valuable support for the printing of documents and manuals to meet the deadlines for training.

The planning, design and execution of this, the fourteenth census, was carried out mainly by the staff of the Statistical Institute. A large number of the staff of STATIN from every Division participated in this exercise. The Director General, Miss Sonia Jackson as Census Officer, in accordance with the requirements of the Statistics Act, was responsible for the coordination of all census activities. The planning, organization and management was led by the Division of Censuses, Social and Demographic Statistics, headed by Dr. Valerie Nam, assisted by Mrs Juliet McCalla-Smith, Miss Philone Mantock, Miss Jessica Campbell and Mrs Heather Prendergast. The data collection activities were managed by Mrs Merville Anderson, Director of Field Services assisted by Mr Herbert Wallace, Senior Field Supervisor as Country Field Coordinator. Mr Mirko Morant led the map preparation activities. Miss Day-Dawn Simon, Head, Research and Development Unit, had responsibility for the development of the classification system for coding occupation and industry. Mr. Douglas Forbes, Director of Surveys and Mr Hubert Sherrard, Senior Statistician had specific responsibility for sample selection and design for the post enumeration survey. Mr Howard Hamilton led the development of the computer processing system and procedures assisted by Mr Boyd Goodin, Data Processing Manager. The

process of data cleaning and correcting is being led by programmers Miss Rene Stewart, Miss Tannecia Blackwood and Miss Marsha South. The members of staff of the Censuses Division who continue to be involved in that process and whose contribution is gratefully acknowledged are Miss Maureen Falloon, Miss Wendy Wignall, Mr Chad Bennett, Mr Kenardo Williams, Miss Daviena Williams, Miss Stacyann Spence and Miss Latoya Hutchinson. Mrs Stacey-Ann Reece-Cleveland former member of the team is also recognized. Miss Heatha Miller, Manager of Information and Marketing has had responsibility for the well-planned and executed publicity programme. Transport of supplies and materials to the local offices was directed by Miss Icylin Cooper, Administrator, while payments to the over 6,000 temporary personnel was the responsibility of Census Finance Officer, Mrs Moreen Samuels and her team. Mr. Michael Thompson, Printing Supervisor, coordinated the printing of all manuals, administrative forms and documents. Special thanks and gratitude to Mr Garfield Atkinson, Statistical Officer in the Censuses Division who provided invaluable service in guiding the process of delivery of materials and supplies to the area offices and the collection of completed work. Many of the Statisticians formed the core group of trainers and undertook the training of the Managers, Area Coordinators, Zone Supervisors and Census Takers. They also provided invaluable support in undertaking quality checks of completed documents during the field enumeration. STATIN's Field Supervisors acted as Regional Managers and Area Coordinators while other members of the staff worked as Census Takers and Supervisors.

The Statistical Institute adopts this medium to express its sincere thanks to the public for cooperating in this exercise. To the news media for their support; to the over six thousand persons including teachers, civil servants and persons from the private sector who served as Area Coordinators, Zone Supervisors and Census Takers. These persons faced many difficulties while serving; poor weather conditions, dogs and a fairly high level of apathy. Sincere thanks also to the drivers and office staff in all sections of the Institute and in particular the clerical staff of the Censuses Division, for their participation in this programme.

BACKGROUND TO THE CENSUS

Legal Authority for the Census

The 2011 Population and Housing Census was taken under the provisions of the Statistics (Amendment) Act 1984. In accordance with Section 4 of the Statistics Act, the House of Representatives approved the Census Order, 2011 on January 5, 2011. This Order authorized the taking of a Population and Housing Census in Jamaica between April 5 and December 31, 2011. Also, under Section 6 of the Act, the Minister of Finance and Planning made the Census Regulations, 2011 on January 5, 2011. These Regulations outlined the conditions under which the census was to be conducted.

Coverage, Design and Methodology

Censuses of population are generally conducted on either a 'de facto' or 'de jure' basis. A 'de facto' census seeks to determine the number and characteristics of the population present in an area at the time of the census. The 'de jure' census identifies the population usually resident in the area whether physically present or not, at the time of the census. The 2011 census, like all since 1943, was conducted on a 'de jure' basis. The 'de jure' count includes all persons, Jamaicans and non-Jamaicans whose usual place of residence was in Jamaica even if they were temporarily (less than six months) abroad at the time of the census.

The following groups were excluded:

- (i) All Jamaicans (including diplomatic personnel) who were away from the country for six months or more;
- (ii) All visitors to Jamaica who are usual residents of other countries; and
- (iii) All foreign diplomatic personnel located in Jamaica.

One questionnaire was developed for use in the census to collect information from households (Appendix II - Form PC011A) and one for individuals (Appendix III - Form PC011B). The data collecting method utilised was the "Interviewer Method". One census taker was assigned to each enumeration district (the smallest census geographic area) to list every building in the area assigned. Where the building was found to be the living quarters of an individual or a group of individuals the form was completed for each household and each person. Each census taker worked with a household form and an individual form. Consideration was also given to the enumeration of persons who live in institutions as well as persons who were located on the streets and this was taken into account in the design.

The census design also included a Post Enumeration Survey planned as a coverage assessment tool. The Post Enumeration Survey was conducted during the period September 7-30, 2011 in all parishes and covered a 5 per cent sample of census EDs. A total of 286 EDs were eventually canvassed.

The Institutional Population

All institutions, which could be regarded as the usual residence of the inhabitants either because they had no other residence or because they were 'long-term' residents, were included. General hospitals, public and private were therefore generally excluded. The treatment of the institutional population as regards the questions asked was determined by the accessibility of the persons resident to the interviewer. Where no access was possible, only age and sex data were retrieved from administrative records. Where access was possible, the entire individual questionnaire was administered. Trainees and students of all educational institutions were canvassed with the individual questionnaire.

If an institution contained separate quarters for staff members, caretakers, etc., these quarters were treated as private dwellings.

Types of Institutions

- (i) Convents and Monasteries
- (ii) University and College Residences
- (iii) Hostels and Residences for Trainees and/or Graduate Teachers, Nurses and Ministers of Religion
- (iv) Military Camps, Police Training Schools and Police Barracks
- (v) Boarding Schools and Other Residential Schools
- (vi) Correctional Institutions, Penitentiaries, Prisons, Rehab Centres, Juvenile Institutions
- (vii) Mental Institutions
- (viii) Homes for Children/Aged/Infirm/Needy
- (ix) Hospitals and Homes providing specialized care
- (x) Hospitals and Homes for the Blind, Deaf and Other Handicapped

Persons on the Streets

This group comprises persons who may or may not be usual residents of a private or non-private dwelling. Area Managers were instructed to familiarise themselves with the locations where such persons tend to frequent for purposes of sleeping, and obtain as much information as possible. Locations included bus parks, markets, drains and sidewalks. Some persons were also identified by charity organizations which provide daily meals for such persons.

The Scope of the Census

The United Nations Principles and Recommendations guided all technical considerations including the choice of topics. The topics included on the census questionnaire were as follows:

Individual Questionnaire

- Age
- Sex
- Relationship to Head of Household
- Religious Affiliation
- Ethnic origin
- Marital and Union Status
- Educational Attainment
- Physical and Mental Limitations
- Birthplace and Residence
- Training
- Economic Activity and Social Welfare
- Fertility
- Transportation
- Information and Communication Technology

Household questionnaire

- Type of Unit
- Material of outer walls
- Material of Roofing
- Number of rooms
- Tenure of Land and Dwelling
- Availability and Type of Kitchen, Bathroom and Toilet Facilities
- Method of Disposal of Solid Waste
- Source of Water for Domestic Use,
- Source of Drinking Water
- Type of Lighting
- Type of Fuel used for Cooking
- Availability of Telephone and other Communication Devices and facilities
- Migration and Mortality

Geographic Division of Jamaica for Census Purposes

Jamaica was divided into 5,776 geographic units called enumeration districts (EDs) for the purpose of data collection during the 2011 Population and Housing Census (see Appendix I). Each ED is an independent unit which shares common boundaries with contiguous EDs. The number of dwellings/households contained in the ED (estimated before the census) was the primary determination of the size of an ED. This was

approximately 150 dwellings/households in urban areas and 100 in rural areas. Each ED was designed to be of a size that would ensure an equitable work load for each census taker, and because dwellings are more widely spaced in rural areas than in urban areas, rural EDs usually contained fewer dwellings/households than their urban counterpart. When grouped together, enumeration districts reconstitute larger divisions; special area, constituency and the parish.

Field Organization

For administrative purposes the island was divided into 7 Regions, 62 Coordinator Areas and 1,029 Supervisory Zones. A central Census Office was established in the Kingston Metropolitan Area (KMA). Seven Regional Managers who were selected from STATIN's permanent field supervisors operated from offices in the KMA, Linstead, May Pen, Black River and Montego Bay. Each of the 62 Area Coordinators maintained an office in a central location in the area. The field organization operated under the direction of the Director of Field Services.

Field Enumeration

Field enumeration started slowly on April 5, 2011 as many Census Takers had not been issued identification cards. For an identification card to be issued, the Area Coordinator must have completed the selection process and submit the relevant information to the head office where checks had to be made to verify the training location of the individual. Photographs for identification were stored by training sites so this information had to be retrieved to request the identification from the service providers.

The collection process limped for the first three weeks of April and returns were slow. Census takers began to express dissatisfaction with what they considered late payments of Training Fees. By the beginning of May with such payments made, the pace of enumeration picked up somewhat but census workers again began agitating for payments of claims for travelling even in some instances with very little or no work done. The militancy continued as the problems with these first payments were resolved very close to the pay period. Some persons threatened to leave the job. At this time members of the senior staff of STATIN were kept busy responding to the media as they were approached by dissatisfied census workers.

A number of supervisors and census takers gave up the job while others were relieved because of non-performance but by the time that began to happen, there were persons available as replacements. The data collection phase ended on August 31, 2011.

Challenges of Data Collection

The main challenges encountered could be summarized in the following-

- the general hostility of the population with what was regarded as a 'government' project;
- the inability to relate their participation with immediate personal benefits;
- the belief that the information would be given to the tax collectors;
- violence in some areas and the inability to be out late at nights;
- incidents of dog bites;
- lack of access to gated communities;
- inefficient and unproductive census workers.

Education in the 2011 Census

Introduction

The United Nations Principles and Recommendations for Population and Housing Censuses (United Nations, 2008) identify Literacy, School Attendance and Educational Attainment as Core Topics to be investigated in Population Censuses. Field of Education and Educational Qualifications are listed as additional topics which may be collected.

The focus of the earliest Jamaican censuses was literacy. “Up to 1921 the assessment of educational status was in terms of the literacy-illiteracy dichotomy. In 1943 and 1960, while the dichotomy was maintained the questions were extended to show various levels of schooling – primary, secondary and tertiary levels. In 1960, a question on years of schooling was introduced. Over time, beginning with 1970, the literacy dichotomy was dropped but the years of schooling maintained as an indicator of literacy, the population with less than 4 years of schooling being considered functionally illiterate.” (Nam, 2010).

The years of schooling question was maintained up to the 1991 census but was abandoned because of the difficulty in capturing the information for persons attending school irregularly. In addition there have been considerable advances in the development of Literacy Surveys. The history and development of the modern education system in Jamaica is well documented. Brereton (1985, 41) explains that:

Going to school was part of normal life for most West Indian children between 1838 and 1938. But a very large number did not go to school at all, and of the majority who did, very many attended irregularly for only a few years. Very few children reached the highest forms of primary schools and only a tiny group got to secondary school.

The National Plan for Jamaica 1957-67 included a programme of educational reform and some of the principles underlying the new policies identified by Miller (1990, 135) were as follows:

Universal primary education for children between the ages of 7 and 11 years, the introduction of a common entrance examination to select students for secondary schools, the award of 2000 free places annually, based on the results of (this examination), the award of 50 scholarships annually to the University of the West Indies to persons willing to teach, to obtain degrees and, possibly, postgraduate diplomas.

As the education system has developed and as education became more universal, the census questions on this very important topic have become more complex. There are numerous challenges in designing census questions on education for the Jamaican population. In the first place provisions must be made for all members of the population including those who would have been educated at a time when the educational system

was much different than it is now. In formulating the questions and the categories consideration has to be given to changing nomenclature. For example, Government school and Elementary school has given way to Primary school. What is now 'grades' were in the earlier years known as 'class' or 'standard'. The educational experience of the birth cohort of 1930 would be considerably different from that of the cohort of 1980. Both cohorts will however be covered in the census and the classifications used must be able to establish equivalence between the levels operating during the decade of the 1940s and the decade of the 1990s.

The individual questionnaire for the 2011 census contained six (6) questions designed to capture information on school attendance and educational attainment as provided for mainly by the formal education system and to some extent, also provided for by the non-formal system. As defined by UNESCO (2006), formal education is: "that which is provided in the system of schools, colleges, universities and other formal educational institutions that normally constitutes a continuous ladder of full-time education for children and young people, generally beginning at age 5-7 and continuing up to 20 or 25 years old. In some countries the upper parts of this 'ladder' are constituted by organised programmes of joint part-time employment and part-time participation in the regular school and university system."

"Non-formal education [on the other hand] is any organized and sustained educational activities that do not correspond exactly to the definition of formal education. [It] may take place both within and outside educational institutions and cater to persons of all ages. This may cover educational programmes to impart adult literacy, basic education for out-of-school children, life-skills, work skills and general culture. Non-formal education programmes do not necessarily follow the 'ladder' system and may have differing duration." This type of education is typically provided in the form of short courses, workshops or seminars.

This distinction between formal and non-formal is not always very clear in the Jamaican context and adds to the complications in designing the census questionnaire. In many situations, non-formal learning is taking place within formal institutions and since it is the institution type which guides the classification process, this can prove problematic. For many persons learning continues long after the exit from the formal system and the challenge for the census taker is to understand what is required for the analysis, to be able to ask the relevant follow-up questions.

For international comparisons, the levels used are guided as far as possible by the International Standard Classification of Education (ISCED) 1997. The Classification of Levels is as follows:

- Pre-primary
- Primary
- Lower Secondary

- Upper Secondary
- Post-Secondary Non Tertiary
- First Stage of Tertiary
- Second Stage of Tertiary

For Jamaican censuses the levels identified, since 1970, for census reporting are:

- Pre-primary
- Primary
- Secondary
- Tertiary (University and Other Tertiary)

Questions 2.1 to 2.6 seen at Appendix III (the Individual Questionnaire) were designed to capture the responses for current and past enrolment. The categories developed for Question 2.3 (current enrolment) and Question 2.4 (past enrolment) were meant to capture all the possible responses even if these responses were not the required ones. A number of 'skips' would then direct the irrelevant responses to a question which could elicit the required response. For example a respondent who indicated the JFLL Programme or HEART at Question 2.3 or 2.4 would be directed to Question 2.5 which asks about the school attended before enrolment in the JFLL or HEART programme and indicates the level of relevance.

The treatment of JFLL and HEART requires some explanation. The JFLL (Jamaica Foundation for Lifelong Learning) Programme is the successor to the Jamaica Literacy Programme (JAMAL) established in the early 1970s as a basic adult educational programme aimed at eradicating literacy. The JFLL is an agency of the Ministry of Education established in 2008 and is charged with the execution of adult and youth learning and lifelong learning interventions *from basic literacy to the secondary level*. A respondent who in 2011 indicated that the last educational programme enrolled in was a JAMAL class in the 1980s is not likely to be placed in the same category as a person who was enrolled in a JFLL programme in 2011. Based on the changes in the overall objectives and focus of the programme, a respondent currently enrolled in a JFLL programme could have gone to secondary school, while another respondent who would have completed a JAMAL programme in 1979 is likely to have had no schooling or very little schooling.

Accurately classifying persons who indicate HEART as a response to questions designed to capture enrolment in the formal system also proves challenging. The HEART (Human Resource and Employment Training) programme was established in 1982 to provide vocational training for secondary school leavers. Since that time HEART has developed in numerous ways, as in addition to the established institutions, there are community-based programmes and programmes in secondary schools and tertiary institutions. For the census questionnaire, a response of HEART in relation to

current or past enrolment required a follow-up question to determine the educational level as required for the census classification.

One important limitation is that the responses to Educational Attainment questions offer no indications that the respondents completed the programme, but rather that they were enrolled or attended an institution at the stipulated level.

Census Findings

Educational Attainment

Educational attainment refers to the most advanced level attended in the educational system of the country where the education was received. Generally, this referred to the last school attended for persons not currently enrolled and the one being attended for the persons currently enrolled. Table (i) presents the distribution of the population 15 years old and over classified by the highest level of educational attainment at the census of 2011 and for comparative purposes, the census of 2001. In addition to the traditional categories of pre-primary, primary, secondary and university, the table show groups categorized as 'other tertiary', 'other' and 'not reported'.

The 'other tertiary' group refers to attendance at institutions which are not universities and which offer tertiary level education. It is important to note that for this category, there is no clear separation between tertiary and post secondary as proposed by the ISCED. In this context therefore the category will include persons who having completed secondary education are enrolled or had been enrolled in programmes, not significantly more advanced than those covered at the upper secondary level, as well as persons at a highly complex and specialised level which may include advanced or professional education (UNESCO, 2006). Some of the institutions included as 'other tertiary', are The College of Arts Science and Technology (now the University of Technology), West Indies College (now the Northern Caribbean University) and the Management Institute for Development (MIND).

The 'other' category comprises persons who could not be fitted into the stated categories due to vague or non-specific responses. The census taker would then write in the response given. An example of a vague response was 'B and E School'. In cases where the response was clear enough to be allocated to one of the stated categories; it would be recoded and re-allocated to that category.

Every question on the census questionnaire includes a 'not stated' category. This is scored when the respondent fails to answer the particular question. Census takers were instructed that this category is to be used only as a last resort as every attempt should be made to obtain a response. The 'not reported' category included in the census tables in some instances can account for a fairly large percentage of the responses. In such

cases the analyst may decide to exclude these and focus only on the total number of valid responses.

Table (i) Distribution of the Population 15 years old and over by Sex and Highest Level of Educational Attainment: 2001 and 2011

Highest Level of Educational Attainment	2011		2001	
	Number	% of Total	Number	% of Total
	BOTH SEXES			
Population 15 years and over	1,983,268	100.0	1,754,384	100.0
No Schooling	9,005	0.5	10,267	0.6
Pre-Primary	2,717	0.1	5,426	0.3
Primary	565,596	28.5	447,157	25.5
Secondary	1,044,568	52.7	974,550	55.5
University	121,888	6.1	73,855	4.2
Other Tertiary	132,869	6.7	141,433	8.1
Other	16,070	0.8	62,180	3.5
Not Reported	90,555	4.6	39,516	2.3
	MALES			
Population 15 years and over	968,645	100.0	848,874	100.0
No Schooling	5,189	0.5	5,877	0.7
Pre-Primary	1,424	0.1	2,812	0.3
Primary	307,947	31.8	235,340	27.7
Secondary	516,337	53.3	477,449	56.3
University	44,792	4.6	31,508	3.7
Other Tertiary	43,439	4.5	48,231	5.7
Other	5,049	0.5	26,240	3.1
Not Reported	44,468	4.6	21,417	2.5
	FEMALES			
Population 15 years and over	1,014,623	100.0	905,510	100.0
No Schooling	3,816	0.4	4,390	0.5
Pre-Primary	1,293	0.1	2,614	0.3
Primary	257,649	25.4	211,817	23.4
Secondary	528,231	52.1	497,101	54.9
University	77,096	7.6	42,347	4.6
Other Tertiary	89,430	8.8	93,202	10.3
Other	11,021	1.1	35,940	4.0
Not Reported	46,087	4.5	18,099	2.0

Table (i) shows a 5 per cent level of non-response for educational attainment for 2011, about twice the percentage for 2001. Of note also is the relatively small percentage of response categorized 'other' in 2011; 0.5 per cent and 1.1 per cent for males and females respectively compared to 3.1 per cent for males and 4.0 per cent for females in 2001. The difference is due to the fact that ready access to the images of the questionnaires during the processing of the 2011 census allowed for the scrutinizing and reallocation of these 'other' responses. This was not done for 2001.

The data show the very small percentage of the population 15 years and over who had never attended school. In 2011, about 0.5 per cent of males and 0.4 per cent of females had received no formal schooling. This compares with 0.7 per cent and 0.5 per cent for men and women respectively in 2001. Of historical interest and to show the considerable improvements since the implementation of the 1957 National Plan, the table (ii) shows the data from the 1960 census. The categories used are an indication of the challenges faced in designing the census questions over time. In 1960, approximately 16 per cent of the population 15 years and older had never attended school.

Table (ii) Highest Level of School Attended for the Population 15 years old and over: 1960

Highest Level of School	Population 15 years old and over	
	Number of Persons	Per cent of Total
Total Population 15+ Years	947,306	100.0
No Education	152,615	16.1
Non-Secondary		
Under 4 years	72,556	7.7
4+ years	656,183	69.3
Secondary	62,656	6.6
Degree	3,296	0.3

The 2011 census results show that approximately 1.045 million persons representing just over one half (53 per cent) of the population 15 years and over had attained at least a secondary level education. This was about 70,000 more persons of similar age than in 2001. The number of persons attaining university level education increased from 74,000 in 2001 to 122,000 in 2011. With regard to the primary level, the percentage of the population attaining at least this level increased from 26 per cent in 2001 to 29 per cent in 2011, from an estimated 447,000 persons in 2001 to 566,000 in 2011.

An examination of the sex differentials by level of attainment shows that women were dominant at the higher levels. Women were more than one and a half times as likely as men to have gone further than the secondary level with about 16 per cent of the female population of this age group attaining university or other tertiary level compared to 9 per cent of men, in 2011. With regard to the changes observed over the period, the

percentage increase for the male population attaining at least a primary level or at least a secondary level of 32 per cent and 53 per cent respectively exceeded the 25 per cent and 52 per cent respectively, for women. In contrast the number of women attaining university level increased by 82% from 42,300 in 2001 to 77,100 in 2011, an addition of 34,800, while the male population attaining this level increased by 13,300 from 31,500 in 2001 to 44,800 in 2011.

Table (iii) Percentage Distribution of the Population 15 years and over by Highest Level of Educational Attainment by Broad Age Groups and Sex: 2011

Highest Level of Educational Attainment	Age Group in Years			
	15-29	30-44	45-59	60 and over
	BOTH SEXES

Not Reported	6.4	3.3	3.5	3.6

Table (iii) presents the data on attainment by broad age groups for both males and females separately for 2011. The table shows the higher levels of attainment among the

younger population for both men and women. More than three-quarters of the population of men and of women at ages 60 years and over had gone no further than primary level (78 per cent of men and 76 per cent of women). The percentage attaining secondary or higher level for the 60 years and over age group was 18 per cent for women and 17 per cent for men. The comparative percentages for the 15-29 years age group were 5 per cent for women and 11 per cent for men attaining at the most a primary level education. At the higher levels in contrast, 82 per cent of men and 88 per cent of women under age 30 had attained secondary or higher level of education.

Current Enrolment

This discussion will focus on enrolment for the 4-17 years population. Age 4 is selected to allow for comparison with 2001 when the minimum age for the census was 4 years and not 3 years as for 2011. Table (iv), which presents the number and percentage of the population enrolled in schools and or in an educational programme by single years of age, shows an enrolment rate of 94 per cent for 2011 up from 91 per cent in 2001. Enrolment rates increase with age in 2011 from 96 per cent at age 4 and peaking at about 99 per cent at age 8 years. Thereafter there are fluctuations between 98 per cent and 99 per cent and a steady decline beginning at age 14 years at 98 per cent falling to 95 per cent at age 15 years, 89 per cent at 16 years and then to the lowest, 71 per cent at age 17 years. A comparison of the 2001 and 2011 enrolment figures shows increases in rates for every single year of age. The increases are especially large for the oldest ages, from approximately 80 per cent to 89 per cent at age 16 years and the largest increase from 50 per cent to 71 per cent at age 17 years.

Table (iv) Distribution of the Population 4-17 years old Currently Enrolled by Single Years of Age: 2011

Age in Years	Population Enrolled in School			
	2011		2001	
	Number	Percentage	Number	Percentage
Total in Age Group	672,831	94.1	710,637	91.3
4	41,262	95.9	50,503	87.6
5	43,994	98.1	54,934	95.7
6	44,275	98.5	59,411	96.8
7	43,707	98.7	58,540	96.9
8	45,200	98.8	57,254	97.1

14	53,311	97.5	48,130	94.0
15	55,830	95.3	45,019	89.7
16	52,601	89.0	40,920	79.5
17	39,913	71.0	25,024	49.8

Parish Analysis

An examination of educational attainment at the parish level (Table (v)) show in the first place that the parishes of St Andrew (19 per cent), St Catherine (16 per cent), Manchester and St James (13 per cent) were the parishes with percentages of persons 15 years and over with tertiary (university and other tertiary) level education, at or above the national level of 13 per cent. Parishes with the percentage share below the national level range from the lowest, 6 per cent for Westmoreland to the highest, 11 per cent for St Ann.

With respect to attainment at the secondary level, Kingston (64 per cent), Westmoreland (59 per cent) and St Thomas (57 per cent) were the parishes with the highest percentages of the population age 15 years and over attaining at least a secondary level of education. Parishes with the highest percentages that attained no more than primary level education were St Elizabeth (40 per cent) and Trelawny (39 per cent).

Table (v) Distribution of the Population 15 years old and over by Highest Level of Educational Attainment by Parish: 2011

Parish	Total Population 15+ years	Highest Level of Educational Attainment				
		No Schooling/ Pre-primary	Primary	Secondary	University	Other Tertiary
All Parishes	1,983,268	0.6	28.5	52.7	6.1	6.7
Kingston	59,878	0.5	19.8	63.7	3.2	5.1
St Andrew	442,510	0.4	19.8	53.3	11.9	7.3
St Thomas	68,435	0.7	28.4	57.4	3.3	5.2
Portland	60,864	0.7	35.8	51.2	3.1	5.5
St Mary	82,410	0.6	33.6	53.3	2.7	5.2
St Ann	125,044	0.7	35.0	48.5	3.1	7.7
Trelawny	54,219	0.7	38.5	47.7	2.7	5.6
St James	133,525	0.5	26.9	54.5	5.2	7.7
Hanover	49,639	0.6	33.4	54.8	2.7	4.8
Westmoreland	102,553	0.7	31.0	59.1	2.2	4.2
St Elizabeth	110,038	1.2	40.7	48.7	2.4	4.3
Manchester	140,886	0.7	34.1	48.2	5.6	7.4
Clarendon	174,538	0.5	34.2	52.5	3.1	5.0
St Catherine	378,729	0.5	25.3	51.7	7.6	8.7

It is important to note that any assessment of educational levels of parishes at the time of the census must be done within the context of the prevailing age structure. Analysis of the age structure of parish populations from the 2011 census (Volume 2 - Age and Sex) identified the parishes with the oldest populations to be St Elizabeth, Manchester and St Mary while the younger populations were predominantly found in the parishes

of Kingston, St Andrew, St Catherine and St James. In light of this and the foregoing analysis of the relationship between age and educational level, it would follow that the parishes with the younger populations would tend to show higher levels of educational attainment when compared to the parishes with the older populations.

Historical Perspective from Administrative Data

The data presented in the tables (vi) and (vii) below have been extracted from the reports presenting enrolment statistics as compiled from the records of the Ministry of Education. Two periods are covered, 1970/1971 and 2010/2011. The information presented shows the changing classifications and the numbers which are indicative of the improvements reflected in the census findings. Although it is not stated in the reports from which the data are extracted, the earlier period appears to cover the government and or government-aided institutions while for the more recent period there is some accounting for independent institutions. The absence of data on the newer universities should be noted.

Table (vi) Enrolment at the beginning of the Academic Year by Institution Type: 1970-1971

Type of Institution	Numbers Enrolled
Public Primary Education	385,696
Infant Schools	
Primary Schools	
All-Age Schools	
Secondary Education	73,360
New Secondary Schools	
Secondary High Schools	
Comprehensive High Schools

Technical Notes

The questions were restricted to the population 3 years old and over.

Study outside of Jamaica is included and the equivalence with the Jamaican educational system was established in determining levels. Home schooling and enrolment in special schools is included and assigned to the relevant level.

Participation in the National Youth Service (NYS), the Youth Empowerment Strategy (YES) Programme, or other youth and/or exchange programmes is excluded.

Explanation of Categories

Currently Enrolled

- Persons currently enrolled, full-time or part-time in an institution or in a programme;
- Persons on holidays from school who intended to return;
- Persons recently registered in a programme of study and who had not actually started.

Not Currently Enrolled

- Persons who had completed a programme of study, with no intention to return or not enrolled in any other programme;

Educational Attainment

This refers to the most advanced level attended in the educational system of the country where the education was received. Generally this referred to the last school attended for persons not currently enrolled, and the one being attended for those persons currently enrolled.

The following categories for institutions are identified:

For Current Enrolment

Primary- includes Preparatory, Primary, Elementary and Grades 1-6 of All-Age and Primary and Junior High Schools.

Secondary- includes Secondary High, Technical High Schools and Grades 7-9 of All-Age Schools and Grades 7-11 of Primary and Junior High Schools.

Commercial And Business Colleges- applies to institutions which offer commercial, secretarial and business training only. Secondary level institutions offering commercial

and business subjects in addition to the regular curriculum are not included here but are included as secondary.

University- this includes enrolment in courses at a University, whether as a day student or as an evening student or through a correspondence course.

Other Tertiary- this applies to tertiary institutions other than university. Included are Teacher Training Colleges, Multi-Disciplinary Colleges such as the College of Agriculture Science and Education (CASE) and the Edna Manley College of the Visual and Performing Arts and Community Colleges. Also included is the Management Institute for National Development (MIND).

For Past Enrolment

For older persons it was necessary to recognise institutions and or programmes which no longer exist or no longer operate at the level which existed at the time when these persons attended. Some of the more notable additions to the categories identified above are outlined below:

Secondary

Included here are Senior Schools, Comprehensive High, and Vocational High Schools.

Other Tertiary

This category includes institutions which have become universities as for example - The College of Arts Science and Technology (CAST) now University of Technology (UTECH), West Indies College now Northern Caribbean University (NCU), The Institute of Management and Production (IMP) and the Institute of Management Sciences now University College of the Caribbean (UCC), Mico Teacher Training College, now Mico University.

The Jamaica School of Agriculture, Jamaica Institute of Management (JIM), The Cultural Training Centre (now Edna Manley College), The UWI School of Continuing Studies (formerly Extra Mural Department) as well as institutions offering training in data processing, insurance etc. are included here.

Notes to the Tables

1. Summary of Population Counts:
 - (i) Population in private dwellings identified from manual records: 2,553,949
 - (ii) Population enumerated in Institutions: 18,420
 - (iii) Population enumerated on the streets: 934
 - (iv) Total population identified from manual records: 2,573,303
 - (v) Number of dwellings identified as occupied but no contact made with residents: 97,000
 - (vi) Population completing questionnaire: 2,214,341
 - (vii) Final population count adjusted for undercount: 2,697, 983
2. **The tables in this report are based on the adjusted data.** The adjustments were guided by the use of standard demographic analysis based on the 2001 census count and vital statistics for the intercensal period. This was supplemented in part by findings of the Post Enumeration Survey conducted immediately following the main enumeration.
3. **Adjustment factors based on age and sex for each parish have been applied to the enumerated population.**
4. **Adjustment factors are calculated to 5 decimal places. The final adjusted figures are rounded to the nearest ten.**
5. **Rounding may cause minor discrepancies between totals and the sums of the component parts of a table.**
6. The census tabulations are based on different population groups, determined by the questions posed to these groups. The tabulations on enrollment and educational attainment are based on a total population of **2,559,921** representing persons 3 years old and over in private dwellings and the following institutions:
 - Convents and Monasteries
 - University and College Residences
 - Hostels and Residences for Trainees and/or Graduate Teachers, Nurses and Ministers of Religion
 - Military Camps, Police Training Schools and Police Barracks
 - Boarding Schools and Other Residential Schools
7. Compiling and analyzing the census data on education has posed many challenges mainly due to missing information and/or to glaring inconsistencies between responses. Inconsistencies as for example between age and education level and level

and examinations passed (not included in this report). Missing cases and inconsistencies which could not be reconciled or corrected have been included in the 'not reported' category. The high percentage of cases in this category has been discussed.

- Islam
- Rastafarian
- Revivalist
- None
- Other (Specify) _____
- Not Stated

**ASK Q1.6 OF PERSONS 16 YEARS OR OLDER .
PERSONS UNDER 16 YEARS. Go to Q1.7**

**1.6 What is your/... 's legal marital status?
For example are you/is married, divorced, widowed or never married?**

(Check: If Q 1.3 is 'wife/husband of head' then Q 1.6 should be Married, If Not, Please Probe)

- Married
- Divorced
- Widowed
- Never Married
- Legally Separated
- Not Stated

ASK Q 1.7 OF PERSONS 5 YEARS OR OLDER

1.7 Do you/does experience difficulty doing any of the following: (Read the categories and insert a code for each that applies)

	Level of Difficulty (Code)	Aid (Code)	Medication (Code)
Seeing			
Hearing			
Walking or climbing stairs			
Remembering and concentrating			
Self-care			
Lifting, reaching and carrying			
Communicating			

Codes For Level of Difficulty: No difficulty -1, Some difficulty - 2, Much difficulty - 3, Cannot do it at all - 4

Codes for Use of Aid and Medication: Yes - 1, No - 2, Not Stated - 9

SECTION 2 EDUCATION (For persons 3 years or older)

2.1 Are you/is currently enrolled in an educational institution or programme?

- Yes
- No (Go to Q2.4)
- Not Stated

ASK Q 2.2 OF PERSONS 3 - 17 YEARS ONLY

2.2 How many days did you/did attend school during the first week of March 2011?

- 5 days
- 3 - 4 days
- 1 - 2 days
- Did not attend
- Not Stated

2.3 What type of educational institution/programme and grade are you/is enrolled in?

- Pre-Primary (Go to Section 4)
- Primary, All Age (Grade 1-6) (Go to Section 4)
- All Age, Primary & Junior High, Secondary High, Technical High (Grade 7-9) (Go to Section 3)
- Agricultural (Grade 10-12), Secondary High (Grade 10-11), Technical High (Grade 10-11) (Go to Q2.7)
- Secondary High, Technical High (Grade 12-13) (Go to Q2.7)
- Commercial/Business College (Go to Q2.5)
- University (Go to Q2.5)
- Other Tertiary (Go to Q2.5)
- HEART Programme (Go to Q2.5)
- JFLL Programme (Go to Q2.5)
- Other (Specify) _____ (Go to Q2.5)
- Not Stated

2.4 What type of educational institution did you/did last attend?

- Pre-Primary (Go to Section 3)
- Primary/All Age/Elementary (Go to Q2.6)
- Secondary High (Go to Q2.6)
- Vocational High (Go to Q2.6)
- Commercial/Business College
- University
- Community College
- Other Tertiary
- HEART Programme
- JFLL Programme
- Other (Specify) _____
- None (Go to Section 3)
- Not Stated

7.3 Have you/has ever lived with someone as a common-law partner?

- Yes
- Never had a husband/wife or common-law partner (Females Go to Section 8. Males Go to Section 9)
- Not Stated

7.4 Are you/is currently living with someone as a common-law partner?

- Yes
- No (Females Go to Section 8. Males Go to Section 9)
- Not Stated

7.5 How long have you/has and your/his/her husband/wife/common-law partner been married/living together?

Years Not Stated

MALES GO TO SECTION 9

SECTION 8 FERTILITY (For females 15-49 years)

8.1 Have you/has ever had liveborn children?

- Yes
- No (Go to Section 9)
- Not Stated

8.2 How many liveborn children and of what sex?

Total Male Female

If Not Stated Record 99

8.3 How many liveborn children are still alive?

Total Male Female

If Not Stated Record 99

8.4 How many liveborn children are living in the household?

Total Male Female

If Not Stated Record 99

8.5 How old were you/was when you had your/she had her first liveborn child?

Not Stated

8.6 How old were you/was when you had your/she had her last liveborn child?

Not Stated

8.7 Did you/did have any livebirths since January 1, 2010?

- Yes
- No (Go to Section 9)
- Not Stated

8.8 How many livebirths have you/has had since January 1, 2010 and what was the sex and date of birth of each?

Total Male Female

Child No.	Sex			Date of Birth

- HEART Programme
- Other Programme (Go to Q3.5)
- Not Stated

3.4 Which one of the following HEART Programmes? Score and Go to Q3.6

- Vocational Training Development Institute (VTDI)
- Vocational Training Centre/ Academy
- School Leavers Training Opportunities Programme (SLTOP)
- Community Based Programme
- On the Job Training
- Apprenticeship
- Other HEART (Specify)_____
- Not Stated

57237

PC 011A

SECTION 2 CHARACTERISTICS OF HOUSING UNIT**2.1 What type of housing unit is this?**

- Separate House-Detached
 Apartment Building
 Townhouse
 Quad
 Other Attached
 Part of Commercial Building
 Improvised Housing Unit
 Other (Specify) _____
 Not Stated

2.2 What is the main type of material used in constructing the outer walls?

- Concrete and Blocks Wood and Concrete
 Stone and Brick Wood and Brick
 Nog Other (Specify) _____
 Wood Not Stated

2.3 What is the main type of material used in constructing the roof?

- Metal Sheeting Tile-Clay
 Concrete Tile-Other
 Shingle-Fibreglass Other (Specify) _____
 Shingle-Other Not Stated

SECTION 3 CHARACTERISTICS OF HOUSEHOLD**3.1 Does any member of this household own, rent or lease this dwelling?**

- Owned Squatted
 Leased Other (Specify) _____
 Rented Not Stated
 Rent Free

ASK Q3.2 ONLY IF SEPARATE HOUSE - DETACHED AT Q2.1**3.2 What about the land - is it owned or leased etc. by any member of this household?**

- Owned Squatted
 Leased Other (Specify) _____
 Rented Not Stated
 Rent Free

3.3 How many rooms does this household occupy?

		<input type="radio"/> Not Stated
--	--	----------------------------------

3.4 How many rooms are used mainly for sleeping?

		<input type="radio"/> Not Stated
--	--	----------------------------------

3.5 Does this household have the use of a kitchen or kitchenette?

- Yes for use only by this household
 Yes shared with another household
 No (Go to Q3.7)
 Not Stated

3.6 Does it (the kitchen or kitchenette) have a sink permanently connected to a water supply and waste pipe?

- Yes No Not Stated
