PREFACE

Jamaica conducted its Fourteenth Census of Population and Housing in 2011. Under the provisions of the Statistics Act, the Statistical Institute of Jamaica (STATIN) is vested with the authority to conduct any census in Jamaica. The census plays an essential role in all elements of the national statistical system, including the economic and social components. Census statistics are used as benchmarks for statistical compilation or as a sampling frame for household sample surveys. The national statistical system of almost every country relies on sample surveys for efficient and reliable data collection. Without the sampling frame derived from the population and housing census, the national statistical system would face difficulties in providing current reliable official statistics.

While recognizing the importance of the census however, countries are faced with serious resource constraints. Census taking in Jamaica faces not only the challenge of limited resources but an apathetic public which views official data collection with suspicion and even hostility. Despite a vibrant publicity programme for Census 2011, the level of cooperation particularly in some urban centres was disappointing. Worker attitude also presented problems as in a number of cases workers had to be relieved of their duties due to poor and or unproductive work. There was not always sufficient recognition of the fact that remuneration was for work done.

The processing of the census returns is a massive undertaking for which STATIN sought to utilize modern technology for this phase. The data processing of the questionnaires was outsourced to XSOMO International Ltd., who was required to produce the electronic data in a database format and images of the questionnaires. Scanning of the forms which began in June 2011 ended on January 31, 2012. The data editing and cleaning were done using software developed internally and shared via the intranet. The validity and consistency checks which follow will continue until a full and clean database is produced. As the process continues, reports on those topics for which checks are completed, will be produced. At a later date, The Statistical Institute will entertain requests for unpublished data according to stipulated procedures and conditions.

This report is one in the series of subject reports which will provide tabulations based on the specific topics covered on the census questionnaire, at varying geographic levels. This report presents tabulations on Housing Units at the enumeration district level for all parishes.

Among the reports to be published is a separate report for each parish which brings together tables on all topics in one volume.

The 2011 Census Subject Reports to be published (not necessarily in the order listed) are as follows:

- Volume 1 - General Report
- Volume 2 - Age and Sex
- Volume 3 - Disability Indicators
- Volume 4 - Education
- Volume 5 - Birthplace, Residence and Migration
- Volume 6 - Ethnic Origin and Religious Affiliation

- Volume 7 - Marital and Union Status
- Volume 8 - Economic Activity
- Volume 9 - Fertility and Mortality
- Volume 10 - Housing
- Volume 11 - Living Arrangements and Household Relationships
- Volume 12 - Miscellaneous

This Report has been prepared within the Division of Censuses, Demographic and Social Statistics by Dr. Valerie Nam, Demographer assisted by Miss Philone Mantock, Senior Statistician.

A handwritten signature in black ink, appearing to read 'C. Coy'.

Carol Coy
Director General
September, 2013

ACKNOWLEDGEMENTS

The Statistical Institute of Jamaica on behalf of the Government of Jamaica, adopts this medium to express its sincere thanks to the people of Jamaica for their cooperation in the 2011 Population and Housing Census.

As is expected in any national undertaking of this magnitude and complexity, a large number of individuals and organizations, both government and non-government, have participated in its planning and execution. Their contribution is hereby acknowledged.

Collaboration and cooperation at the regional level has been a feature of Caribbean Censuses for decades and for this census, CARICOM through the Regional Census Coordinating Committee, provided valuable support. The financial support from The United Nations Population Fund (UNFPA) for the publicity programme is hereby acknowledged.

The members of the Technical Committee; representatives from the University of the West Indies, the Planning Institute of Jamaica, the technical specialists from the Ministries of Health, Education, Housing and The Environment, Transport and Works, all contributed to the technical deliberations.

The publicity programme gained valuable assistance from Mr Curtis Myrie of Ideal Promotions. XSOMO International Limited undertook the printing of the questionnaires and also had the responsibility for the electronic capture of the information from the questionnaires. STATIN would like especially to recognize Mr. Errol Anderson and the XSOMO team; Mr Neil Williams, Miss Cara Murray, Messers Douglas Aris and Andrew Wilkinson and Miss Jascith Riley. W and S Printing Services provided valuable support for the printing of documents and manuals to meet the deadlines for training.

The planning, design and execution of this, the fourteenth census, was carried out mainly by the staff of the Statistical Institute. A large number of the staff of STATIN from every Division participated in this exercise. The Director General, Miss Sonia Jackson as Census Officer, in accordance with the requirements of the Statistics Act, was responsible for the coordination of all census activities. The planning, organization and management was led by the Division of Censuses, Social and Demographic Statistics, headed by Dr. Valerie Nam, assisted by Mrs Juliet McCalla-Smith, Miss Philone Mantock, Miss Jessica Campbell and Mrs Heather Prendergast. The data collection activities were managed Mrs Merville Anderson, Director of Field Services assisted by Mr Herbert Wallace, Senior Field Supervisor as Country Field Coordinator. Mr Mirko Morant led the map preparation activities. Miss Day-Dawn Simon, Head, Research and Development Unit, had responsibility for the development of the classification system for coding occupation and industry. Mr. Douglas Forbes, Director of Surveys and Mr Hubert Sherrard, Senior Statistician had specific responsibility for sample selection and design for the post enumeration survey. Mr Howard Hamilton led the development of the computer processing system and procedures assisted by Mr Boyd Goodin, Data Processing Manager. The

process of data cleaning and correcting is being led by programmers Miss Rene Stewart, Miss Tannecia Blackwood and Miss Marsha South. The members of staff of the Censuses Division who continue to be involved in that process and whose contribution is gratefully acknowledged are Miss Maureen Falloon, Miss Wendy Wignall, Mr Chad Bennett, Mr Kenardo Williams, Miss Daviena Williams, Miss Stacyann Spence and Miss Latoya Hutchinson. Mrs Stacey-Ann Reece-Cleveland former member of the team is also recognized. Miss Heatha Miller, Manager of Information and Marketing has had responsibility for the well-planned and executed publicity programme. Transport of supplies and materials to the local offices was directed by Miss Icylin Cooper, Administrator, while payments to the over 6,000 temporary personnel was the responsibility of Census Finance Officer, Mrs Moreen Samuels and her team. Mr. Michael Thompson, Printing Supervisor, coordinated the printing of all manuals, administrative forms and documents. Special thanks and gratitude to Mr Garfield Atkinson, Statistical Officer in the Censuses Division who provided invaluable service in guiding the process of delivery of materials and supplies to the area offices and the collection of completed work. Many of the Statisticians formed the core group of trainers and undertook the training of the Managers, Area Coordinators, Zone Supervisors and Census Takers. They also provided invaluable support in undertaking quality checks of completed documents during the field enumeration. STATIN's Field Supervisors acted as Regional Managers and Area Coordinators while other members of the staff worked as Census Takers and Supervisors.

The Statistical Institute adopts this medium to express its sincere thanks to the public for cooperating in this exercise. To the news media for their support; to the over six thousand persons including teachers, civil servants and persons from the private sector who served as Area Coordinators, Zone Supervisors and Census Takers. These persons faced many difficulties while serving; poor weather conditions, dogs and a fairly high level of apathy. Sincere thanks also to the drivers and office staff in all sections of the Institute and in particular the clerical staff of the Censuses Division, for their participation in this programme.

BACKGROUND TO THE CENSUS

Legal Authority for the Census

The 2011 Population and Housing Census was taken under the provisions of the Statistics (Amendment) Act 1984. In accordance with Section 4 of the Statistics Act, the House of Representatives approved the Census Order, 2011 on January 5, 2011. This Order authorized the taking of a Population and Housing Census in Jamaica between April 5 and December 31, 2011. Also, under Section 6 of the Act, the Minister of Finance and Planning made the Census Regulations, 2011 on January 5, 2011. These Regulations outlined the conditions under which the census was to be conducted.

Coverage, Design and Methodology

Censuses of population are generally conducted on either a 'de facto' or 'de jure' basis. A 'de facto' census seeks to determine the number and characteristics of the population present in an area at the time of the census. The 'de jure' census identifies the population usually resident in the area whether physically present or not, at the time of the census. The 2011 census, like all since 1943, was conducted on a 'de jure' basis. The 'de jure' count includes all persons, Jamaicans and non-Jamaicans whose usual place of residence was in Jamaica even if they were temporarily (less than six months) abroad at the time of the census.

The following groups were excluded:

- (i) All Jamaicans (including diplomatic personnel) who were away from the country for six months or more;
- (ii) All visitors to Jamaica who are usual residents of other countries; and
- (iii) All foreign diplomatic personnel located in Jamaica.

One questionnaire was developed for use in the census to collect information from households (Appendix IV - Form PC011A) and one for individuals (Appendix V - Form PC011B). The data collecting method utilised was the "Interviewer Method". One census taker was assigned to each enumeration district (the smallest census geographic area) to list every building in the area assigned. Where the building was found to be the living quarters of an individual or a group of individuals the form was completed for each household and each person. Each census taker worked with a household form and an individual form. Consideration was also given to the enumeration of persons who live in institutions as well as persons who were located on the streets and this was taken into account in the design.

The census design also included a Post Enumeration Survey planned as a coverage assessment tool. The Post Enumeration Survey was conducted during

the period September 7-30, 2011 in all parishes and covered a 5 per cent sample of census EDs. A total of 286 EDs were eventually canvassed.

The Institutional Population

All institutions, which could be regarded as the usual residence of the inhabitants either because they had no other residence or because they were 'long-term' residents, were included. General hospitals, public and private were therefore generally excluded. The treatment of the institutional population as regards the questions asked was determined by the accessibility of the persons resident to the interviewer. Where no access was possible, only age and sex data were retrieved from administrative records. Where access was possible, the entire individual questionnaire was administered. Trainees and students of all educational institutions were canvassed with the individual questionnaire.

If an institution contained separate quarters for staff members, caretakers, etc., these quarters were treated as private dwellings.

Types of Institutions

- (i) Convents and Monasteries
- (ii) University and College Residences
- (iii) Hostels and Residences for Trainees and/or Graduate Teachers, Nurses and Ministers of Religion
- (iv) Military Camps, Police Training Schools and Police Barracks
- (v) Boarding Schools and Other Residential Schools
- (vi) Correctional Institutions, Penitentiaries, Prisons, Rehab Centres, Juvenile Institutions
- (vii) Mental Institutions
- (viii) Homes for Children/Aged/Infirm/Needy
- (ix) Hospitals and Homes providing specialized care
- (x) Hospitals and Homes for the Blind, Deaf and Other Handicapped

Persons on the Streets

This group comprises persons who may or may not be usual residents of a private or non-private dwelling. Area Managers were instructed to familiarise themselves with the locations where such persons tend to frequent for purposes of sleeping, and obtain as much information as possible. Locations included bus parks, markets, drains and sidewalks. Some persons were also identified by charity organizations which provide daily meals for such persons.

The Scope of the Census

The United Nations Principles and Recommendations guided all technical considerations including the choice of topics. The topics included on the census questionnaire were as follows:

Individual Questionnaire

- Age
- Sex
- Relationship to Head of Household
- Religious Affiliation
- Ethnic origin
- Marital and Union Status
- Educational Attainment
- Physical and Mental Limitations
- Birthplace and Residence
- Training
- Economic Activity and Social Welfare
- Fertility
- Transportation
- Information and Communication Technology

Household questionnaire

- Type of Unit
- Material of outer walls
- Material of Roofing
- Number of rooms
- Tenure of Land and Dwelling
- Availability and Type of Kitchen, Bathroom and Toilet Facilities
- Method of Disposal of Solid Waste
- Source of Water for Domestic Use,
- Source of Drinking Water
- Type of Lighting
- Type of Fuel used for Cooking
- Availability of Telephone and other Communication Devices and facilities
- Migration and Mortality

Geographic Division of Jamaica for Census Purposes

Jamaica was divided into 5,776 geographic units called enumeration districts (EDs) for the purpose of data collection during the 2011 Population and Housing Census (see Appendix I). Each ED is an independent unit which shares common boundaries with contiguous EDs. The number of dwellings/households contained in the ED (estimated before the census) was the primary determination

of the size of an ED. This was approximately 150 dwellings/households in urban areas and 100 in rural areas. Each ED was designed to be of a size that would ensure an equitable work load for each census taker, and because dwellings are more widely spaced in rural areas than in urban areas, rural EDs usually contained fewer dwellings/households than their urban counterpart. When grouped together, enumeration districts reconstitute larger divisions; special area, constituency and the parish.

Field Organization

For administrative purposes the island was divided into 7 Regions, 62 Coordinator Areas and 1,029 Supervisory Zones. A central Census Office was established in the Kingston Metropolitan Area (KMA). Seven Regional Managers who were selected from STATIN's permanent field supervisors operated from offices in the KMA, Linstead, May Pen, Black River and Montego Bay. Each of the 62 Area Coordinators maintained an office in a central location in the area. The field organization operated under the direction of the Director of Field Services.

Field Enumeration

Field enumeration started slowly on April 5, 2011 as many Census Takers had not been issued identification cards. For an identification card to be issued, the Area Coordinator must have completed the selection process and submit the relevant information to the head office where checks had to be made to verify the training location of the individual. Photographs for identification were stored by training sites so this information had to be retrieved to request the identification from the service providers.

The collection process limped for the first three weeks of April and returns were slow. Census takers began to express dissatisfaction with what they considered late payments of Training Fees. By the beginning of May with such payments made, the pace of enumeration picked up somewhat but census workers again began agitating for payments of claims for travelling even in some instances with very little or no work done. The militancy continued as the problems with these first payments were resolved very close to the pay period. Some persons threatened to leave the job. At this time members of the senior staff of STATIN were kept busy responding to the media as they were approached by dissatisfied census workers.

A number of supervisors and census takers gave up the job while others were relieved because of non-performance but by the time that began to happen, there were persons available as replacements. The data collection phase ended on August 31, 2011.

Challenges of Data Collection

The main challenges encountered could be summarized in the following-

- the general hostility of the population with what was regarded as a 'government' project;
- the inability to relate their participation with immediate personal benefits;
- the belief that the information would be given to the tax collectors;
- violence in some areas and the inability to be out late at nights;
- incidents of dog bites;
- lack of access to gated communities;
- inefficient and unproductive census workers.

The 2011 Housing Census

Introduction

Household

A household may consist of one person who lives alone or a group of persons who, as a unit, jointly occupy the whole or part of a dwelling unit, who have common arrangements for housekeeping, and who generally share at least one meal. The household may be composed of related persons only, of unrelated persons, or a combination of both.

The following cases should be noted:

- All lodgers, domestic helpers, farm hands and other employees who live in the dwelling and consider it, their usual place of residence are included as members of the household;
- If an individual sleeps in the same structure as the main household and shares at least one meal per day with the household, he or she is included as a household member;
- A domestic employee who sleeps in the house or in an out-building on the premises is listed as a member of the household if he or she sleeps there on an average of four nights per week and shares at least one meal daily. If the helper's partner or children live on the premises, all members of this family are to be included with the main household if they share meals with the main household. If there are separate arrangements for cooking they should be considered as a separate household;
- In the case of a tenement yard where there is a series of rooms rented to different persons by the landlord, each person or group of persons who live and share meals together is regarded as a separate household. A household in this special context may share external bathroom, toilet or even kitchen facilities with other similar households.

Building

A building is defined as a physical structure which is separate and independent from any other. A building should comprise one or more rooms, or other space which is covered by a roof and enclosed within external or dividing walls which extend from the foundations to the roof. A building is usually designed for residential, agricultural, commercial, industrial or cultural purposes, or for the provision of services, and may be a detached house, apartment building, factory, shop, warehouse, repair shop etc.

Detached rooms relating to main buildings are treated as part of the main buildings; for example, detached kitchens, toilets, helpers' quarters, garages etc.

A building may be a detached dwelling, apartment building, factory, shop, warehouse, repair shop etc.

Housing Unit

A housing unit is a building or buildings used for living purposes at the time of the census.

Dwelling Unit

A dwelling is any building or separate part of a building in which a person or group of persons lived at the time of the census. It therefore represents the living quarters of those present.

The essential features of a dwelling unit are "separateness and independence". An enclosure is separate if surrounded by walls or other forms of partitioning, covered by a roof so that a person or group of persons, can isolate themselves from other persons for purposes of sleeping, preparing and sharing meals. It is independent when it has *direct access* from the street or common landing, staircase, passage or gallery; when occupants can come in and go out of it without passing through anybody else's accommodation.

Private dwellings are those in which private households reside. Non-Private or Group Dwellings are defined as those in which the occupants live collectively for disciplinary, health, education, religious, military, work or other reasons. Living collectively means that they usually eat common meals and share common domestic services.

Type of Tenure of Dwelling

Owned

This applies if the dwelling is owned solely by member(s) of the household. If the dwelling is occupied by the family or close relatives of the owner, but the owner even if he sometimes sleeps there, is not a member of the household according to the census definition (for example, where wife and children of the owner live in the dwelling, but the owner perhaps because of his work, or for other reasons, does not normally sleep in the dwelling, and is then not a member of the household concerned), the dwelling should **not** be classified as owned but as **Rent Free**.

Leased

This relates to those cases where the dwelling is rented in accordance with an agreement (written or unwritten) for a stipulated period, between the owner and the occupier. In most cases, this agreement of lease will stipulate the rental payable, and length of time for which the building is rented.

Rented

This is used here to relate to those cases which are the most usual where the occupier pays a monthly rental to the owner for the dwelling, on the basis of an agreement which may be written or unwritten.

Rent Free

In addition to the situation described above, this relates also to those cases where occupiers are not required to pay rental. It implies also that the occupiers are occupying the dwelling with the consent of the owner. Examples of this arrangement are where the government, a business (for example a Bank) or some institution (for example a school or a church) may provide free quarters for some employees.

Squatted

This relates to those cases where occupiers of the dwelling are not paying rent and are occupying the dwelling without the consent of the owner.

Type of Housing Units

Separate House-Detached

This is the most common type of unit. This is the type usually constructed for occupation by a single household and which has open space on all four sides. The entire structure may be at ground level, or it may be at several levels. Duplex houses separated by garages were included in this category.

Attached Units

All units which are joined together by at least one wall. These include apartment buildings, townhouses, urbanas, quadrominiums etc. These latter are types of units found mostly in the Greater Portmore area of St. Catherine.

Part of Commercial Building

The term 'commercial' is used here to include all non-residential buildings. This includes all cases where a household occupied part of a building which was intended for use mainly as a business place or other non-living unit.

Improvised Housing Unit

This is an independent makeshift shelter or structure built usually of wasted materials generally considered unfit for habitation, which is being used as living quarters at the time of the census, usually by one household.

Other

This includes any type of unit which does not fit in any of the categories stated.

Material of Outer Walls

Concrete and Blocks

Included are walls of concrete blocks with steel reinforcement but not nogging. Units made of 'prefabricated' material are included in this category.

Stone and Brick

This applies where walls are made of stone or of red bricks, made by a kiln-burning process.

Nog

This comprises units in which the walls are of concrete but without steel reinforcement e.g. walls reinforced by wooden frames with concrete filling.

Wattle/Adobe

Also called 'wattle and daub', this describes walls made of some kind of wattle structure i.e. pure wattle walls, wattle and thatch walls and wattle daubed with earth plaster; (wattle is comprised of sticks inter-woven into a network).

Wood, Wood and Concrete, Wood and Brick are self-explanatory.

Technical Notes and Notes to the Tables

1. Summary of Population Counts:
 - (i) Population in private dwellings identified from manual records: 2,553,949
 - (ii) Population enumerated in Institutions: 18,420
 - (iii) Population enumerated on the streets: 934
 - (iv) Total population identified from manual records: 2,573,303
 - (v) Population completing questionnaire: 2,214,341
 - (vi) Final population count adjusted for undercount: 2,697, 983
2. Summary of Counts from Housing Census :
 - (i) Private Housing Units Enumerated : 587,221
 - (ii) Private Dwelling Units Enumerated : 699,829
 - (iii) Number of private dwellings identified as occupied but no contact made with residents: 97,000
 - (iv) Private Households Enumerated: 717,243
 - (v) Number of Institutions: 341
3. Summary of Final Counts from Housing Census adjusted for undercount:
 - (i) Private Housing Units : 711,333
 - (ii) Private Dwelling Units: 853,661
 - (iii) Private Households: 881,070

No adjustments are made for institutions. **All tables are based on Private Households only.**

The tables in this report are based on the adjusted data.

4. The adjustments were guided by the use of standard demographic analysis based on the 2001 census count and vital statistics for the intercensal period. This was supplemented in part by findings of the Post Enumeration Survey conducted immediately following the main enumeration.
5. **Adjustment factors are calculated to 5 decimal places. The final adjusted figures are rounded to the nearest ten.**
6. **Rounding may cause minor discrepancies between totals and the sums of the component parts of a table.**

7. Uninhabited and Other Special EDs by Parish, Constituency and Special Area

Parish, Constituency and ED	Special Area/Community	Status
Kingston West 42	Hannah Town/Craig Town	Uninhabited*
Kingston West 50	West Downtown	Uninhabited
St Andrew South West 62	GreenwichTown/Newport West	Uninhabited
St Andrew West 74	Seaview Gardens	Very Sparsely populated
St Thomas East 5	Rural	Uninhabited
Portland East 27	Port Antonio	Uninhabited
Clarendon South East 77	Rural	Very Sparsely populated
St Catherine East 85	Spanish Town	Very Sparsely populated
St Catherine East Central 14	Spanish Town	Uninhabited
St Catherine West Central 69	Spanish Town	Uninhabited
St Catherine South Central 77	Spanish Town	Institution Only
St Catherine South East 107	Portmore	Institution Only
St Catherine South West 27	Old Harbour	Very Sparsely populated
St Catherine East Central 7	Rural	Uninhabited
St Catherine East Central 15	Rural	Very Sparsely populated

* Public General Hospital only. Not covered in census.

APPENDIX I

NOTES ON MAPPING AND GEOGRAPHIC DIVISIONS

Census data will be presented at various geographic levels as follows: enumeration district (ED), special area, constituency and parish. The ED has already been defined.

The Special Area

Any group of contiguous enumeration districts which make up either a rural or an urban area of special interest is called a Special Area. Three classes of special areas were identified for the country in the 2011 Census:

1. Class A special areas: These include all parish capitals and the Kingston Metropolitan Area (KMA) which covers Kingston and urban St Andrew;
2. Class B special areas: These include all other urban centres in Jamaica with a population of 2,000 or more persons;
3. Class C special areas: These are rural areas of special interest.

The Constituency

This is a political unit created for the purpose of parliamentary representations. Constituency boundaries are legally defined and in 2011 there were sixty three (63) constituencies in Jamaica (representing the maximum possible under the Jamaican Constitution). All enumeration districts are grouped according to constituencies and as such no enumeration district cuts across any constituency boundary.

The Parish

This is an established legal division which provides the broad framework for the grouping of all other census divisions and as such is not violated by them. There are 14 parishes, each consisting of two or more constituencies and upwards of 190 enumeration districts.

Urban Areas

In Jamaica, an area is classified as urban if it possesses a population of 2,000 or more persons and provides a number of amenities and utilities that indicate modern living. The definition emphasizes population and land use and seeks to ensure that the urban landscape reflects a strong mix of Commercial, Industrial, Residential and other urban land use functions.

Minimum criteria for classification of an urban area

For an area to be considered as urban, it must have at least one of each of the following commercial, financial, professional, residential and public services:

1. Commercial Activity

- Pharmacy
- Supermarket/ Wholesale
- Furniture / Appliance store
- Auto shop
- Restaurant
- Gas Station
- Beauty shop & Barbershop
- Department store

2. Financial Services

- PC bank
- ATM

3. Professional Services

- Doctor's office

4. Residential

- Guest House
- Population (2,000)

5. Public Services

- Postal Agency
- Police Station
- Library
- Health Facility
- Market
- School
- Church
- Recreational Area
- Utilities
- Waste Disposal
- Transportation

Of the total 5,776 EDs identified for Census 2011, 2,909 were classified as urban. A total of 49 urban special areas/centres were identified and are listed below by parish:

Kingston and St Andrew- The KMA (Kingston and urban St Andrew)

St Thomas - Morant Bay, Port Morant, Bath, Yallahs

Portland - Port Antonio, Buff Bay

St Mary - Port Maria, Annotto Bay, Highgate, Oracabessa, Gayle/Lucky Hill

St Ann - St Ann's Bay, Brown's Town, Ocho Rios, Claremont, Discovery Bay, Runaway Bay

Trelawny - Falmouth, Duncans, Clark's Town

St James - Montego Bay

Hanover - Lucea, Negril

Westmoreland - Savanna-La-Mar, Grange Hill, Darliston, Negril

St Elizabeth - Black River, Santa Cruz, Balaclava, Junction

Manchester - Mandeville, Christiana, Porus, Spalding

Clarendon - May Pen, Chapelton, Frankfield, Spalding, Lionel Town, Hayes

St Catherine - Spanish Town, Portmore, Old Harbour, Old Harbour Bay, Linstead, Bog Walk, Ewarton

REVISION OF BOUNDARIES

In the process of mapping boundaries for censuses boundaries of EDs and special areas are very often revised to take account of population shifts.

In cases where there has been significant population change (increase or decline), oversized EDs may be split into two or more parts and undersized EDs merged with one or more neighbouring EDs in order to re-establish the average population size of the ED. Either change would result in a change of the boundaries of the original ED.

Over time, ED boundaries may disappear, become difficult or may simply be no longer appropriate because of the changes in the physical or built up environment. New features would then have to be selected to replace the old outdated features.

In order to address population change in a special area which has undergone boundary changes between 2001 and 2011 you might need to do the following:

EITHER Hold the 2011 boundary constant and recalculate the 2001 population found within the 2011 boundary;

OR Hold the 2001 boundary constant and compare the 2001 count within that boundary with the 2011 count within the same physical area.

BOUNDARY CHANGES FOR MAIN URBAN CENTRES FOR 2011:

1. Kingston Metropolitan Area (KMA)
2. Montego Bay
3. Mandeville
4. Spanish Town
5. Portmore
6. May Pen

Each of these towns with *the exception of KMA* reflected boundary changes for Census 2011. These changes are highlighted on the maps enclosed for each town (Appendix III). Of significance are the changes made to Portmore.

KMA

The KMA maintained the same urban boundary it had in 2001.

Montego Bay and Mandeville

Minor revisions to the boundaries of Montego Bay and Mandeville were made and these did not significantly alter their physical shape. In the case of Montego Bay there was expansion to the northeast in the vicinity of Rose Hall while Mandeville had a small area added to its north-eastern boundary in the vicinity of Royal Flat.

Spanish Town

Changes have been made to the eastern boundaries of Spanish Town. Expansions were made in the northeast and southeast regions of Central Village. Also changes were made to include the areas of Lakes Pen and Lime Tree Grove to the southeast of Spanish Town.

A section south of the industrial area of White Marl was removed as it was essentially rural in character.

Portmore

Since 2001 revisions have been made to the Portmore boundary to include Hellshire (now re-classified as urban). Changes were also made on the northwest boundary of Portmore with the inclusion of the new development of Caribbean Estates.

May Pen

Only one minor modification was made to the western section of the boundary of May Pen within the vicinity of Four Paths. As such the physical shape of May Pen was not significantly altered.
