PREFACE

Jamaica conducted its Fourteenth Census of Population and Housing in 2011. Under the provisions of the Statistics Act, the Statistical Institute of Jamaica (STATIN) is vested with the authority to conduct any census in Jamaica. The census plays an essential role in all elements of the national statistical system, including the economic and social components. Census statistics are used as benchmarks for statistical compilation or as a sampling frame for household sample surveys. The national statistical system of almost every country relies on sample surveys for efficient and reliable data collection. Without the sampling frame derived from the population and housing census, the national statistical system would face difficulties in providing current reliable official statistics.

While recognizing the importance of the census however, countries are faced with serious resource constraints. Census taking in Jamaica faces not only the challenge of limited resources but an apathetic public which views official data collection with suspicion and even hostility. Despite a vibrant publicity programme for Census 2011, the level of cooperation particularly in some urban centres was disappointing. Worker attitude also presented problems as in a number of cases workers had to be relieved of their duties due to poor and or unproductive work. There was not always sufficient recognition of the fact that remuneration was for work done.

The processing of the census returns is a massive undertaking for which STATIN sought to utilize modern technology for this phase. The data processing of the questionnaires was out-sourced to XSOMO International Ltd., who was required to produce the electronic data in a database format and images of the questionnaires. Scanning of the forms which began in June 2011 ended on January 31, 2012. The data editing and cleaning were done using software developed internally and shared via the intranet. The validity and consistency checks which follow will continue until a full and clean database is produced. As the process continues, reports on those topics for which checks are completed, will be produced. At a later date, The Statistical Institute will entertain requests for unpublished data according to stipulated procedures and conditions.

This report is one in the series of subject reports which will provide tabulations based on the specific topics covered on the census questionnaire, at varying geographic levels. This report presents tabulations on Living Conditions and Household Composition. Tabulations are presented at the parish level.

Among the reports to be published is a separate report for each parish which brings together tables on all topics in one volume.

The 2011 Census Subject Reports to be published (not necessarily in the order listed) are as follows:

- Volume 1 - General Report
- Volume 2 - Age and Sex
- Volume 3 - Disability Indicators
- Volume 4 - Education

- Volume 5 - Birthplace, Residence and Migration
- Volume 6 - Ethnic Origin and Religious Affiliation
- Volume 7 - Marital and Union Status
- Volume 8 - Economic Activity
- Volume 9 - Fertility and Mortality
- Volume 10 - Housing
- Volume 11 - Living Conditions and Household Composition
- Volume 12 - Miscellaneous

This Report has been prepared within the Division of Censuses, Demographic and Social Statistics by Dr. Valerie Nam, Demographer assisted by Miss Philone Mantock, Senior Statistician.

Carol Coy
Director General
November, 2013

ACKNOWLEDGEMENTS

The Statistical Institute of Jamaica on behalf of the Government of Jamaica, adopts this medium to express its sincere thanks to the people of Jamaica for their cooperation in the 2011 Population and Housing Census.

As is expected in any national undertaking of this magnitude and complexity, a large number of individuals and organizations, both government and non-government, have participated in its planning and execution. Their contribution is hereby acknowledged.

Collaboration and cooperation at the regional level has been a feature of Caribbean Censuses for decades and for this census, CARICOM through the Regional Census Coordinating Committee, provided valuable support. The financial support from The United Nations Population Fund (UNFPA) for the publicity programme is hereby acknowledged.

The members of the Technical Committee; representatives from the University of the West Indies, the Planning Institute of Jamaica, the technical specialists from the Ministries of Health, Education, Housing and The Environment, Transport and Works, all contributed to the technical deliberations.

The publicity programme gained valuable assistance from Mr Curtis Myrie of Ideal Promotions. XSOMO International Limited undertook the printing of the questionnaires and also had the responsibility for the electronic capture of the information from the questionnaires. STATIN would like especially to recognize Mr. Errol Anderson and the XSOMO team; Mr Neil Williams, Miss Cara Murray, Messers Douglas Aris and Andrew Wilkinson and Miss Jascith Riley. W and S Printing Services provided valuable support for the printing of documents and manuals to meet the deadlines for training.

The planning, design and execution of this, the fourteenth census, was carried out mainly by the staff of the Statistical Institute. A large number of the staff of STATIN from every Division participated in this exercise. The Director General, Miss Sonia Jackson as Census Officer, in accordance with the requirements of the Statistics Act, was responsible for the coordination of all census activities. The planning, organization and management was led by the Division of Censuses, Social and Demographic Statistics, headed by Dr. Valerie Nam, assisted by Mrs Juliet McCalla-Smith, Miss Philone Mantock, Miss Jessica Campbell and Mrs Heather Prendergast. The data collection activities were managed Mrs Merville Anderson, Director of Field Services assisted by Mr Herbert Wallace, Senior Field Supervisor as Country Field Coordinator. Mr Mirko Morant led the map preparation activities. Miss Day-Dawn Simon, Head, Research and Development Unit, had responsibility for the development of the classification system for coding occupation and industry. Mr. Douglas Forbes, Director of Surveys and Mr Hubert Sherrard, Senior Statistician had specific responsibility for sample selection and

design for the post enumeration survey. Mr Howard Hamilton led the development of the computer processing system and procedures assisted by Mr Boyd Goodin, Data Processing Manager. The process of data cleaning and correcting is being led by programmers Miss Rene Stewart, Miss Tannecia Blackwood and Miss Marsha South. The members of staff of the Censuses Division who continue to be involved in that process and whose contribution is gratefully acknowledged are Miss Maureen Falloon, Miss Wendy Wignall, Mr Chad Bennett, Mr Kenardo Williams, Miss Daviena Williams, Miss Stacyann Spence and Miss Latoya Hutchinson. Mrs Stacey-Ann Reece-Cleveland former member of the team is also recognized. Miss Heatha Miller, Manager of Information and Marketing has had responsibility for the well-planned and executed publicity programme. Transport of supplies and materials to the local offices was directed by Miss Icylin Cooper, Administrator, while payments to the over 6,000 temporary personnel was the responsibility of Census Finance Officer, Mrs Moreen Samuels and her team. Mr. Michael Thompson, Printing Supervisor, coordinated the printing of all manuals, administrative forms and documents. Special thanks and gratitude to Mr Garfield Atkinson, Statistical Officer in the Censuses Division who provided invaluable service in guiding the process of delivery of materials and supplies to the area offices and the collection of completed work. Many of the Statisticians formed the core group of trainers and undertook the training of the Managers, Area Coordinators, Zone Supervisors and Census Takers. They also provided invaluable support in undertaking quality checks of completed documents during the field enumeration. STATIN's Field Supervisors acted as Regional Managers and Area Coordinators while other members of the staff worked as Census Takers and Zone Supervisors.

The Statistical Institute adopts this medium to express its sincere thanks to the public for cooperating in this exercise. To the news media for their support; to the over six thousand persons including teachers, civil servants and persons from the private sector who served as Area Coordinators, Zone Supervisors and Census Takers. These persons faced many difficulties while serving; poor weather conditions, dogs and a fairly high level of apathy. Sincere thanks also to the drivers and office staff in all sections of the Institute and in particular the clerical staff of the Censuses Division, for their participation in this programme.

BACKGROUND TO THE CENSUS

Legal Authority for the Census

The 2011 Population and Housing Census was taken under the provisions of the Statistics (Amendment) Act 1984. In accordance with Section 4 of the Statistics Act, the House of Representatives approved the Census Order, 2011 on January 5, 2011. This Order authorized the taking of a Population and Housing Census in Jamaica between April 5 and December 31, 2011. Also, under Section 6 of the Act, the Minister of Finance and Planning made the Census Regulations, 2011 on January 5, 2011. These Regulations outlined the conditions under which the census was to be conducted.

Coverage, Design and Methodology

Censuses of population are generally conducted on either a 'de facto' or 'de jure' basis. A 'de facto' census seeks to determine the number and characteristics of the population present in an area at the time of the census. The 'de jure' census identifies the population usually resident in the area whether physically present or not, at the time of the census. The 2011 census, like all since 1943, was conducted on a 'de jure' basis. The 'de jure' count includes all persons, Jamaicans and non-Jamaicans whose usual place of residence was in Jamaica even if they were temporarily (less than six months) abroad at the time of the census.

The following groups were excluded:

- (i) All Jamaicans (including diplomatic personnel) who were away from the country for six months or more;
- (ii) All visitors to Jamaica who are usual residents of other countries; and
- (iii) All foreign diplomatic personnel located in Jamaica.

One questionnaire was developed for use in the census to collect information from households (Appendix II - Form PC011A) and one for individuals (Appendix III - Form PC011B). The data collecting method utilised was the "Interviewer Method". One census taker was assigned to each enumeration district (the smallest census geographic area) to list every building in the area assigned. Where the building was found to be the living quarters of an individual or a group of individuals the form was completed for each household and each person. Each census taker worked with a household form and an individual form. Consideration was also given to the enumeration of persons who live in institutions as well as persons who were located on the streets and this was taken into account in the design.

The census design also included a Post Enumeration Survey planned as a coverage assessment tool. The Post Enumeration Survey was conducted during

the period September 7-30, 2011 in all parishes and covered a 5 per cent sample of census EDs. A total of 286 EDs were eventually canvassed.

The Institutional Population

All institutions, which could be regarded as the usual residence of the inhabitants either because they had no other residence or because they were 'long-term' residents, were included. General hospitals, public and private were therefore generally excluded. The treatment of the institutional population as regards the questions asked was determined by the accessibility of the persons resident to the interviewer. Where no access was possible, only age and sex data were retrieved from administrative records. Where access was possible, the entire individual questionnaire was administered. Trainees and students of all educational institutions were canvassed with the individual questionnaire.

If an institution contained separate quarters for staff members, caretakers, etc., these quarters were treated as private dwellings.

Types of Institutions

- (i) Convents and Monasteries
- (ii) University and College Residences
- (iii) Hostels and Residences for Trainees and/or Graduate Teachers, Nurses and Ministers of Religion
- (iv) Military Camps, Police Training Schools and Police Barracks
- (v) Boarding Schools and Other Residential Schools
- (vi) Correctional Institutions, Penitentiaries, Prisons, Rehab Centres, Juvenile Institutions
- (vii) Mental Institutions
- (viii) Homes for Children/Aged/Infirm/Needy
- (ix) Hospitals and Homes providing specialized care
- (x) Hospitals and Homes for the Blind, Deaf and Other Handicapped

Persons on the Streets

This group comprises persons who may or may not be usual residents of a private or non-private dwelling. Area Managers were instructed to familiarise themselves with the locations where such persons tend to frequent for purposes of sleeping, and obtain as much information as possible. Locations included bus parks, markets, drains and sidewalks. Some persons were also identified by charity organizations which provide daily meals for such persons.

The Scope of the Census

The United Nations Principles and Recommendations guided all technical considerations including the choice of topics. The topics included on the census questionnaire were as follows:

Individual Questionnaire

- Age
- Sex
- Relationship to Head of Household
- Religious Affiliation
- Ethnic origin
- Marital and Union Status
- Educational Attainment
- Physical and Mental Limitations
- Birthplace and Residence
- Training
- Economic Activity and Social Welfare
- Fertility
- Transportation
- Information and Communication Technology

Household questionnaire

- Type of Unit
- Material of outer walls
- Material of Roofing
- Number of rooms
- Tenure of Land and Dwelling
- Availability and Type of Kitchen, Bathroom and Toilet Facilities
- Method of Disposal of Solid Waste
- Source of Water for Domestic Use,
- Source of Drinking Water
- Type of Lighting
- Type of Fuel used for Cooking
- Availability of Telephone and other Communication Devices and facilities
- Migration and Mortality

Geographic Division of Jamaica for Census Purposes

Jamaica was divided into 5,776 geographic units called enumeration districts (EDs) for the purpose of data collection during the 2011 Population and Housing Census (see Appendix I). Each ED is an independent unit which shares common boundaries with contiguous EDs. The number of dwellings/households contained in the ED (estimated before the census) was the primary determination

of the size of an ED. This was approximately 150 dwellings/households in urban areas and 100 in rural areas. Each ED was designed to be of a size that would ensure an equitable work load for each census taker, and because dwellings are more widely spaced in rural areas than in urban areas, rural EDs usually contained fewer dwellings/households than their urban counterpart. When grouped together, enumeration districts reconstitute larger divisions; special area, constituency and the parish.

Field Organization

For administrative purposes the island was divided into 7 Regions, 62 Coordinator Areas and 1,029 Supervisory Zones. A central Census Office was established in the Kingston Metropolitan Area (KMA). Seven Regional Managers who were selected from STATIN's permanent field supervisors operated from offices in the KMA, Linstead, May Pen, Black River and Montego Bay. Each of the 62 Area Coordinators maintained an office in a central location in the area. The field organization operated under the direction of the Director of Field Services.

Field Enumeration

Field enumeration started slowly on April 5, 2011 as many Census Takers had not been issued identification cards. For an identification card to be issued, the Area Coordinator must have completed the selection process and submit the relevant information to the head office where checks had to be made to verify the training location of the individual. Photographs for identification were stored by training sites so this information had to be retrieved to request the identification from the service providers.

The collection process limped for the first three weeks of April and returns were slow. Census takers began to express dissatisfaction with what they considered late payments of Training Fees. By the beginning of May with such payments made, the pace of enumeration picked up somewhat but census workers again began agitating for payments of claims for travelling even in some instances with very little or no work done. The militancy continued as the problems with these first payments were resolved very close to the pay period. Some persons threatened to leave the job. At this time members of the senior staff of STATIN were kept busy responding to the media as they were approached by dissatisfied census workers.

A number of supervisors and census takers gave up the job while others were relieved because of non-performance but by the time that began to happen, there were persons available as replacements. The data collection phase ended on August 31, 2011.

Challenges of Data Collection

The main challenges encountered could be summarized in the following-

- the general hostility of the population with what was regarded as a 'government' project;
- the inability to relate their participation with immediate personal benefits;
- the belief that the information would be given to the tax collectors;
- violence in some areas and the inability to be out late at nights;
- incidents of dog bites;
- lack of access to gated communities;
- inefficient and unproductive census workers.

Living Conditions and Household Composition in the 2011 Census

Introduction

The tabulations on this topic are derived from the merge of the data from the population census with the data from the housing census. Living conditions refer to the facilities available to households as well as the type of living quarters. Facilities cover such areas as number of rooms, source of water for domestic use, type of toilet facilities, source of lighting, type of fuel used for cooking and method of garbage disposal. Household composition is established on the basis of the relationship to the head of the household. Basic to the interpretation of the data is an understanding of the concepts of household and household head.

Explanation of Categories

Household

A household may consist of one person who lives alone or a group of persons who, as a unit, jointly occupy the whole or part of a dwelling unit, who have common arrangements for housekeeping, and who generally share at least one meal. The household may be composed of related persons only, of unrelated persons, or a combination of both.

The following cases should be noted:

- All lodgers, domestic helpers, farm hands and other employees who live in the dwelling and consider it, their usual place of residence are included as members of the household;
- If an individual sleeps in the same structure as the main household and shares at least one meal per day with the household, he or she is included as a household member;
- A domestic employee who sleeps in the house or in an out-building on the premises is listed as a member of the household if he or she sleeps there on an average of four nights per week and shares at least one meal daily. If the helper's partner or children live on the premises, all members of this family are to be included with the main household if they share meals with the main household. If there are separate arrangements for cooking they should be considered as a separate household;

- In the case of a tenement yard where there is a series of rooms rented to different persons by the landlord, each person or group of persons who live and share meals together is regarded as a separate household. A household in this special context may share external bathroom, toilet or even kitchen facilities with other similar households.

It is very important to understand that there are clear distinctions between family and household.

Elaborating on the distinction the United Nations guidelines (United Nations 2008, 129) continue as follows:

From the definitions of 'household' and 'family', it is clear that household and family are different concepts that cannot be used interchangeably in the same census. The difference between the household and the family is (a) that a household may consist of only one-person but a family must contain at least two members; and (b) that the members of a multi-person household need not be related to each other, while the members of a family must be related.

"A household can contain more than one family, or one or more families together with one or more non-related persons, or it can consist entirely of non-related persons."

Household Head and Household Relationships

The concept of household head is crucial to understanding household relationships. For census purposes, every household must have a head. The head is the person, man or woman, who generally carries the main responsibility in the affairs of the household. *In any event, the person recognized by the respondent as the head, should be accepted as such, for census purposes.* In the case of a group of unrelated persons sharing a dwelling on an equal basis, that member of the group whom the others acknowledge as such should be taken as the head. In a one person household, that person is the head.

Some countries establish relationships between all household members. In such cases a schedule on the household questionnaire is used to record the relationship of each person to every other household member. For Jamaica as for most countries the relationship established is to *one reference person* referred to as 'household head'. It is very important to understand the concept of headship. Although as stated above it is generally the person who carries the main responsibility for the household, it may be any person indicated as a reference person. Nevertheless this person is expected to be an adult. In some cases

however a young person may be recognized. *The minimum age accepted for the census is 14 years.* Young heads of large households as shown in the tables must therefore be interpreted within this context.

Figure (i) is a reproduction of the question on 'relationship to head' as it appeared on the 2011 census individual questionnaire.

Figure (i)

1.3 What is your/ ...'s relationship to the head of the household?

- ☐ Head
- ☐ Wife/Husband of Head
- ☐ Common Law Partner of Head
- ☐ Child of Head and Spouse/ Partner
- ☐ Child of Head Only
- ☐ Child of Spouse/Partner Only
- ☐ Spouse/Partner of Child
- ☐ Grandchild of Head/Spouse/Partner
- ☐ Parent of Head/Spouse/Partner
- ☐ Brother/Sister of Head/Spouse/Partner
- ☐ Other Relative of Head/Spouse/Partner
- ☐ Domestic Employee
- ☐ Other Non-Relative
- ☐ Not Stated

For Jamaica 'child' in the context of relationship to head is any child, natural or adopted of either head and or spouse, irrespective of age or marital status. This is not in keeping with the global recommendations which state that for census purposes, a child is any unmarried individual, regardless of age, who lives with his or her parent(s) and has no children in the same household. To conform to the UN recommendations would be to introduce additional questions and extensive probing. Consequently however as the United Nations guidelines (2008, 131) indicates "the definition of a child is primarily a function of an individual's relationship to other household members, regardless of age."

'Wife/Husband of Head' is identified as 'Spouse' in the tabulations.

For classification of household composition in this report relatives of head (other than spouse/partner who in this context is considered related) are blood relatives - children, grandchildren, parents, brother, sister and other relatives. Non-relatives are spouse/partner of child, domestic employee and other non-relative.

Accordingly, the classification of household composition is as follows:

- One Person household- one person living alone.
- Couple without children (of head and or spouse) - couple living alone.
- Couple living with children (of head and or spouse) only.
- One parent with children - head living with his or her children only.
- Couple living with children of either or both and other persons related and unrelated.
- Couple living with no children of either or both, living with other persons related and unrelated.
- One parent living with children and with other persons related and unrelated.
- Head living with no children, living with other persons related and unrelated.

This type of classification can be extended further to group household types as nuclear, extended and composite as described in the UN guidelines (2008, 133).

Household Size- represents the number of persons living as a household.

Housing Conditions/Facilities

Source of Lighting

The categories are self-explanatory. If more than one type is used, the one used most frequently is identified.

Type of Fuel

The categories are self-explanatory. If more than one type is used, the one used most frequently is identified. LPG is Liquid Petroleum Gas.

Number of Rooms

This represents the total number of rooms occupied/accessed on a regular basis by the household. THIS DOES NOT REPRESENT THE TOTAL NUMBER OF ROOMS IN A UNIT BUT RATHER THE NUMBER OF ROOMS AVAILABLE FOR USE BY EACH HOUSEHOLD OCCUPYING THE UNIT. The term 'room' is taken to include those used for general living purposes such as bedrooms, dining

rooms, drawing rooms, family rooms, studios, helpers' rooms. Included also are rooms used for professional and business services.

Excluded are garages, bathrooms, toilets, kitchens, verandahs, passages, closets, foyers, and the like. Where partitions of a durable nature are utilized the partitioned area is regarded as a room. Use of curtains to separate sections of a room is not considered however. Included in the count are all rooms as defined even if they were not all used on a regular basis.

Type of Housing Units

Separate House-Detached

This is the most common type of unit. This is the type usually constructed for occupation by a single household and which has open space on all four sides. The entire structure may be at ground level, or it may be at several levels. Duplex houses separated by garages were included in this category.

Attached Units

All units which are joined together by at least one wall. These include apartment buildings, townhouses, urbanas, quadrominiums etc. These latter are types of units found mostly in the Greater Portmore area of St. Catherine.

Part of Commercial Building

The term 'commercial' is used here to include all non-residential buildings. This includes all cases where a household occupied part of a building which was intended for use mainly as a business place or other non-living unit.

Improvised Housing Unit

This is an independent makeshift shelter or structure built usually of wasted materials generally considered unfit for habitation, which is being used as living quarters at the time of the census, usually by one household.

Other

This includes any type of unit which does not fit in any of the categories stated.

Material of Outer Walls

Concrete and Blocks

Included are walls of concrete blocks with steel reinforcement but not nogging. Units made of 'prefabricated' material are included in this category.

Stone and Brick

This applies where walls are made of stone or of red bricks, made by a kiln-burning process.

Nog

This comprises units in which the walls are of concrete but without steel reinforcement e.g. walls reinforced by wooden frames with concrete filling.

Wattle/Adobe

Also called 'wattle and daub', this describes walls made of some kind of wattle structure i.e. pure wattle walls, wattle and thatch walls and wattle daubed with earth plaster; (wattle is comprised of sticks inter-woven into a network).

Wood, Wood and Concrete, Wood and Brick are self-explanatory.

Type of Toilet Facilities

If the household has available to it more than one kind of toilet facility, the more improved type is indicated. In this context water closets are considered to be more improved than pit latrines. The facility scored indicates that which is available to the household whether or not it is shared with another household(s).

Availability of Toilet Facilities

Shared or not shared with another household. Note that sharing means sharing with another household.

Please note that the use of a public toilet indicates that the household does not have toilet facilities.

Water Supply

The main source is indicated. In general, precedence is given to the source for cooking and drinking over the source for bathing, washing and other uses.

Public Piped into Dwelling

Public refers to a water supply established and maintained by the government or a government related agency, for example, the National Water Commission. This category represents instances where the water supply was from a public source and was carried by pipes into the dwelling. In situations where pipes had been installed but because of a lack of water in the area the householders were forced to use another source, it was this other source which was scored. This category was scored only if water was received through pipes connected to the dwelling.

Public Piped into Yard

This applies to cases when the householder's water was from a public source and was carried by pipes into the yard only. This category was scored only if water was received through pipes connected into the yard only.

Private Piped into Dwelling

This applies when the main source of domestic water was not a public one and it was piped into the dwelling. Examples of private sources are a private well or tank from which there were pipes which carried water into the dwelling.

Private Catchment, Not Piped

This applies if the water supply was from a non-public catchment and was **not** piped into the dwelling.

Public Standpipe

This relates to a public standpipe, usually located along roads or other public thoroughfares.

Public Catchment

This is applicable if the main source of water for domestic use is supplied from a public tank or other catchment and is not piped into the premises. In those cases the water is probably obtained by going to the tank.

Spring/River

This is applicable if the main source of domestic water is obtained from a spring or river.

Trucked Water/Water Truck

This is applicable if the regular supply of domestic water is trucked into the area whether purchased or free, delivered by private or public trucks etc.

Other

This includes all other sources of water supply. This was also scored in instances where water is received from neighbours on a regular basis.

Method of Garbage Disposal

In cases where the household used more than one method of disposal, the method used most frequently is indicated.

Regular Public Collection System

Refers to a collection system where garbage was collected on a regular basis i.e. during a specified time period such as twice weekly or fortnightly, by the local government authorities or a government related agency.

Irregular Public Collection System

Refers to a collection system where garbage was collected by the local government authorities or a government related agency but not on a regular basis i.e. collection was done in an unpredictable manner.

Private Collection System

This was scored where a private company was authorized to collect garbage.

Burn

This applies when the household's main disposal of garbage was by burning.

Bury

This refers to the disposal of garbage by burying in a hole in the ground. This may be done in one's own yard or at some other location.

Dumping in Sea/River/Pond/Gully

This describes the disposal of garbage into the sea, river, pond or gully.

Dumping in Own Yard

This refers to the disposal of garbage by throwing in the back yard. It should not be confused with burying, which involves the digging of a hole.

Dumping at Municipal Site

This applies to instances where the respondent takes garbage to a site identified by local authorities as a dump.

Other Dumping

Dumping not previously identified.

Other Method

Any method not previously identified.

Technical Notes and Notes to the Tables

1. Summary of Population Counts:
 - (i) Population in private dwellings identified from manual records: 2,553,949
 - (ii) Population enumerated in Institutions: 18,420
 - (iii) Population enumerated on the streets: 934
 - (iv) Total population identified from manual records: 2,573,303
 - (v) Number of dwellings identified as occupied but no contact made with residents: 97,000
 - (vi) Population completing questionnaire: 2,214,341
 - (vii) Final population count adjusted for undercount: 2,697, 983
2. **The tables in this report are based on the adjusted data.** The adjustments were guided by the use of standard demographic analysis based on the 2001 census count and vital statistics for the intercensal period. This was supplemented in part by findings of the Post Enumeration Survey conducted immediately following the main enumeration.
3. **Adjustment factors based on age and sex for each parish have been applied to the enumerated population.**
4. **Adjustment factors are calculated to 5 decimal places. The final adjusted figures are rounded to the nearest ten.**
5. **Rounding may cause minor discrepancies between totals and the sums of the component parts of a table.**
6. The housing census covers private dwellings only. Consequently the tabulations on Living Conditions and Household Relationships are based on the population resident in private dwellings only. The final adjusted count of this population is **2,678,629**.
7. As indicated in the introductory notes every household must have a head. This check was a very important part of the processing. Where the head refused or was otherwise not enumerated another person would have been scored head. As part of the data cleaning process persons who were underage or otherwise not accepted as possible heads were excluded from the tabulations based on head of household. Omissions from the tabulations on household population would also include cases where a household form was identified with no matching person records.

Summary Tables
