PREFACE

Jamaica conducted its Fourteenth Census of Population and Housing in 2011. Under the provisions of the Statistics Act, the Statistical Institute of Jamaica (STATIN) is vested with the authority to conduct any census in Jamaica. The census plays an essential role in all elements of the national statistical system, including the economic and social components. Census statistics are used as benchmarks for statistical compilation or as a sampling frame for household sample surveys. The national statistical system of almost every country relies on sample surveys for efficient and reliable data collection. Without the sampling frame derived from the population and housing census, the national statistical system would face difficulties in providing current reliable official statistics.

While recognizing the importance of the census however, countries are faced with serious resource constraints. Census taking in Jamaica faces not only the challenge of limited resources but an apathetic public which views official data collection with suspicion and even hostility. Despite a vibrant publicity programme for Census 2011, the level of cooperation particularly in some urban centres was disappointing. Worker attitude also presented problems as in a number of cases workers had to be relieved of their duties due to poor and or unproductive work. There was not always sufficient recognition of the fact that remuneration was for work done.

The processing of the census returns is a massive undertaking for which STATIN sought to utilize modern technology for this phase. The data processing of the questionnaires was out-sourced to XSOMO International Ltd., who was required to produce the electronic data in a database format and images of the questionnaires. Scanning of the forms which began in June 2011 ended on January 31, 2012. The data editing and cleaning were done using software developed internally and shared via the intranet. The validity and consistency checks which follow will continue until a full and clean database is produced. As the process continues, reports on those topics for which checks are completed, will be produced. At a later date, The Statistical Institute will entertain requests for unpublished data according to stipulated procedures and conditions.

This report is one in the series of subject reports which will provide tabulations based on the specific topics covered on the census questionnaire, at varying geographic levels. This report presents tabulations on levels of difficulty experienced by the population in various areas of mental and physical activity, which are used as indicators of disability prevalence. Tabulations are presented at the parish level.

Among the reports to be published is a separate report for each parish which brings together tables on all topics in one volume.

The 2011 Census Subject Reports to be published (not necessarily in the order listed) are as follows:

- Volume 1 - General Report
- Volume 2 - Age and Sex
- Volume 3 - Disability Indicators

- Volume 4 - Education
- Volume 5 - Birthplace, Residence and Migration
- Volume 6 - Ethnic Origin and Religious Affiliation
- Volume 7 - Marital and Union Status
- Volume 8 - Economic Activity
- Volume 9 - Fertility and Mortality
- Volume 10 - Housing
- Volume 11 - Living Arrangements and Household Relationships
- Volume 12 - Miscellaneous

This Report has been prepared within the Division of Censuses, Demographic and Social Statistics by Dr. Valerie Nam, Demographer assisted by Miss Philone Mantock, Senior Statistician.

Carol Coy
Director General
June 2013

ACKNOWLEDGEMENTS

The Statistical Institute of Jamaica on behalf of the Government of Jamaica, adopts this medium to express its sincere thanks to the people of Jamaica for their cooperation in the 2011 Population and Housing Census.

As is expected in any national undertaking of this magnitude and complexity, a large number of individuals and organizations, both government and non-government, have participated in its planning and execution. Their contribution is hereby acknowledged.

Collaboration and cooperation at the regional level has been a feature of Caribbean Censuses for decades and for this census, CARICOM through the Regional Census Coordinating Committee, provided valuable support. The financial support from The United Nations Population Fund (UNFPA) for the publicity programme is hereby acknowledged.

The members of the Technical Committee; representatives from the University of the West Indies, the Planning Institute of Jamaica, the technical specialists from the Ministries of Health, Education, Housing and The Environment, Transport and Works, all contributed to the technical deliberations.

The publicity programme gained valuable assistance from Mr Curtis Myrie of Ideal Promotions. XSOMO International Limited undertook the printing of the questionnaires and also had the responsibility for the electronic capture of the information from the questionnaires. STATIN would like especially to recognize Mr. Errol Anderson and the XSOMO team; Mr Neil Williams, Miss Cara Murray, Messers Douglas Aris and Andrew Wilkinson and Miss Jascith Riley. W and S Printing Services provided valuable support for the printing of documents and manuals to meet the deadlines for training.

The planning, design and execution of this, the fourteenth census, was carried out mainly by the staff of the Statistical Institute. A large number of the staff of STATIN from every Division participated in this exercise. The Director General, Miss Sonia Jackson as Census Officer, in accordance with the requirements of the Statistics Act, was responsible for the coordination of all census activities. The planning, organization and management was led by the Division of Censuses, Social and Demographic Statistics, headed by Dr. Valerie Nam, assisted by Mrs Juliet McCalla-Smith, Miss Philone Mantock, Miss Jessica Campbell and Mrs Heather Prendergast. The data collection activities were managed Mrs Merville Anderson, Director of Field Services assisted by Mr Herbert Wallace, Senior Field Supervisor as Country Field Coordinator. Mr Mirko Morant led the map preparation activities. Miss Day-Dawn Simon, Head, Research and Development Unit, had responsibility for the development of the classification system for coding occupation and industry. Mr. Douglas Forbes, Director of Surveys and Mr Hubert Sherrard, Senior Statistician had specific responsibility for sample selection and

design for the post enumeration survey. Mr Howard Hamilton led the development of the computer processing system and procedures assisted by Mr Boyd Goodin, Data Processing Manager. The process of data cleaning and correcting is being led by programmers Miss Rene Stewart, Miss Tannecia Blackwood and Miss Marsha South. The members of staff of the Censuses Division who continue to be involved in that process and whose contribution is gratefully acknowledged are Miss Maureen Falloon, Miss Wendy Wignall, Mr Chad Bennett, Mr Kenardo Williams, Miss Daviena Williams, Miss Stacyann Spence and Miss Latoya Hutchinson. Mrs Stacey-Ann Reece-Cleveland former member of the team is also recognized. Miss Heatha Miller, Manager of Information and Marketing has had responsibility for the well-planned and executed publicity programme. Transport of supplies and materials to the local offices was directed by Miss Icylin Cooper, Administrator, while payments to the over 6,000 temporary personnel was the responsibility of Census Finance Officer, Mrs Moreen Samuels and her team. Mr. Michael Thompson, Printing Supervisor, coordinated the printing of all manuals, administrative forms and documents. Special thanks and gratitude to Mr Garfield Atkinson, Statistical Officer in the Censuses Division who provided invaluable service in guiding the process of delivery of materials and supplies to the area offices and the collection of completed work. Many of the Statisticians formed the core group of trainers and undertook the training of the Managers, Area Coordinators, Zone Supervisors and Census Takers. They also provided invaluable support in undertaking quality checks of completed documents during the field enumeration. STATIN's Field Supervisors acted as Regional Managers and Area Coordinators while other members of the staff worked as Census Takers and Supervisors.

The Statistical Institute adopts this medium to express its sincere thanks to the public for cooperating in this exercise. To the news media for their support; to the over six thousand persons including teachers, civil servants and persons from the private sector who served as Area Coordinators, Zone Supervisors and Census Takers. These persons faced many difficulties while serving; poor weather conditions, dogs and a fairly high level of apathy. Sincere thanks also to the drivers and office staff in all sections of the Institute and in particular the clerical staff of the Censuses Division, for their participation in this programme.

BACKGROUND TO THE CENSUS

Legal Authority for the Census

The 2011 Population and Housing Census was taken under the provisions of the Statistics (Amendment) Act 1984. In accordance with Section 4 of the Statistics Act, the House of Representatives approved the Census Order, 2011 on January 5, 2011. This Order authorized the taking of a Population and Housing Census in Jamaica between April 5 and December 31, 2011. Also, under Section 6 of the Act, the Minister of Finance and Planning made the Census Regulations, 2011 on January 5, 2011. These Regulations outlined the conditions under which the census was to be conducted.

Coverage, Design and Methodology

Censuses of population are generally conducted on either a 'de facto' or 'de jure' basis. A 'de facto' census seeks to determine the number and characteristics of the population present in an area at the time of the census. The 'de jure' census identifies the population usually resident in the area whether physically present or not, at the time of the census. The 2011 census, like all since 1943, was conducted on a 'de jure' basis. The 'de jure' count includes all persons, Jamaicans and non-Jamaicans whose usual place of residence was in Jamaica even if they were temporarily (less than six months) abroad at the time of the census.

The following groups were excluded:

- (i) All Jamaicans (including diplomatic personnel) who were away from the country for six months or more;
- (ii) All visitors to Jamaica who are usual residents of other countries; and
- (iii) All foreign diplomatic personnel located in Jamaica.

One questionnaire was developed for use in the census to collect information from households (Appendix II - Form PC011A) and one for individuals (Appendix III - Form PC011B). The data collecting method utilised was the "Interviewer Method". One census taker was assigned to each enumeration district (the smallest census geographic area) to list every building in the area assigned. Where the building was found to be the living quarters of an individual or a group of individuals the form was completed for each household and each person. Each census taker worked with a household form and an individual form. Consideration was also given to the enumeration of persons who live in institutions as well as persons who were located on the streets and this was taken into account in the design.

The census design also included a Post Enumeration Survey planned as a coverage assessment tool. The Post Enumeration Survey was conducted during

the period September 7-30, 2011 in all parishes and covered a 5 per cent sample of census EDs. A total of 286 EDs were eventually canvassed.

The Institutional Population

All institutions, which could be regarded as the usual residence of the inhabitants either because they had no other residence or because they were 'long-term' residents, were included. General hospitals, public and private were therefore generally excluded. The treatment of the institutional population as regards the questions asked was determined by the accessibility of the persons resident to the interviewer. Where no access was possible, only age and sex data were retrieved from administrative records. Where access was possible, the entire individual questionnaire was administered. Trainees and students of all educational institutions were canvassed with the individual questionnaire.

If an institution contained separate quarters for staff members, caretakers, etc., these quarters were treated as private dwellings.

Types of Institutions

- (i) Convents and Monasteries
- (ii) University and College Residences
- (iii) Hostels and Residences for Trainees and/or Graduate Teachers, Nurses and Ministers of Religion
- (iv) Military Camps, Police Training Schools and Police Barracks
- (v) Boarding Schools and Other Residential Schools
- (vi) Correctional Institutions, Penitentiaries, Prisons, Rehab Centres, Juvenile Institutions
- (vii) Mental Institutions
- (viii) Homes for Children/Aged/Infirm/Needy
- (ix) Hospitals and Homes providing specialized care
- (x) Hospitals and Homes for the Blind, Deaf and Other Handicapped

Persons on the Streets

This group comprises persons who may or may not be usual residents of a private or non-private dwelling. Area Managers were instructed to familiarise themselves with the locations where such persons tend to frequent for purposes of sleeping, and obtain as much information as possible. Locations included bus parks, markets, drains and sidewalks. Some persons were also identified by charity organizations which provide daily meals for such persons.

The Scope of the Census

The United Nations Principles and Recommendations guided all technical considerations including the choice of topics. The topics included on the census questionnaire were as follows:

Individual Questionnaire

- Age
- Sex
- Relationship to Head of Household
- Religious Affiliation
- Ethnic origin
- Marital and Union Status
- Educational Attainment
- Physical and Mental Limitations
- Birthplace and Residence
- Training
- Economic Activity and Social Welfare
- Fertility
- Transportation
- Information and Communication Technology

Household questionnaire

- Type of Unit
- Material of outer walls
- Material of Roofing
- Number of rooms
- Tenure of Land and Dwelling
- Availability and Type of Kitchen, Bathroom and Toilet Facilities
- Method of Disposal of Solid Waste
- Source of Water for Domestic Use,
- Source of Drinking Water
- Type of Lighting
- Type of Fuel used for Cooking
- Availability of Telephone and other Communication Devices and facilities
- Migration and Mortality

Geographic Division of Jamaica for Census Purposes

Jamaica was divided into 5,776 geographic units called enumeration districts (EDs) for the purpose of data collection during the 2011 Population and Housing Census (see Appendix I). Each ED is an independent unit which shares common boundaries with contiguous EDs. The number of dwellings/households contained in the ED (estimated before the census) was the primary determination

of the size of an ED. This was approximately 150 dwellings/households in urban areas and 100 in rural areas. Each ED was designed to be of a size that would ensure an equitable work load for each census taker, and because dwellings are more widely spaced in rural areas than in urban areas, rural EDs usually contained fewer dwellings/households than their urban counterpart. When grouped together, enumeration districts reconstitute larger divisions; special area, constituency and the parish.

Field Organization

For administrative purposes the island was divided into 7 Regions, 62 Coordinator Areas and 1,029 Supervisory Zones. A central Census Office was established in the Kingston Metropolitan Area (KMA). Seven Regional Managers who were selected from STATIN's permanent field supervisors operated from offices in the KMA, Linstead, May Pen, Black River and Montego Bay. Each of the 62 Area Coordinators maintained an office in a central location in the area. The field organization operated under the direction of the Director of Field Services.

Field Enumeration

Field enumeration started slowly on April 5, 2011 as many Census Takers had not been issued identification cards. For an identification card to be issued, the Area Coordinator must have completed the selection process and submit the relevant information to the head office where checks had to be made to verify the training location of the individual. Photographs for identification were stored by training sites so this information had to be retrieved to request the identification from the service providers.

The collection process limped for the first three weeks of April and returns were slow. Census takers began to express dissatisfaction with what they considered late payments of Training Fees. By the beginning of May with such payments made, the pace of enumeration picked up somewhat but census workers again began agitating for payments of claims for travelling even in some instances with very little or no work done. The militancy continued as the problems with these first payments were resolved very close to the pay period. Some persons threatened to leave the job. At this time members of the senior staff of STATIN were kept busy responding to the media as they were approached by dissatisfied census workers.

A number of supervisors and census takers gave up the job while others were relieved because of non-performance but by the time that began to happen, there were persons available as replacements. The data collection phase ended on August 31, 2011.

Challenges of Data Collection

The main challenges encountered could be summarized in the following-

- the general hostility of the population with what was regarded as a 'government' project;
- the inability to relate their participation with immediate personal benefits;
- the belief that the information would be given to the tax collectors;
- violence in some areas and the inability to be out late at nights;
- incidents of dog bites;
- lack of access to gated communities;
- inefficient and unproductive census workers.

DISABILITY INDICATORS IN THE 2011 CENSUS

Introduction

“Disability, a complex multidimensional experience, poses several challenges for measurement. Approaches to measuring disability vary across countries and influence the results. Operational measures of disability vary according to the purpose and application of the data, the conception of disability, the aspects of disability examined- impairments, activity limitations, participation restrictions, related health conditions, environmental factors- the definitions, question design, reporting sources, data collection methods and expectations of functioning.” (WHO, 2011).

The statement by the WHO reflects the almost ongoing challenge in measuring disability. The typical sources for collecting disability statistics are national censuses and surveys and administrative data registries and specific studies. The WHO argues that each source has its purposes, strengths and weaknesses. One of the main advantages of the census particularly in large countries is that the data can be tabulated for small local areas. In small countries, care has to be taken however as confidentiality may be comprised. The census also provides a useful sampling frame for research on persons with disabilities that are otherwise difficult to find, such as the blind, the deaf or the mentally impaired.

The limitations of the census do however tend to outweigh the advantages. Firstly, the subject matter of the census is limited to basic socio-economic and demographic statistics so the range and depth of the interviews on the special situation of the disabled are limited. In the second place, given the massive training requirements for a census, interviewers may be limited in the amount of training received on the subject of disability, which needs specific guidelines. Third and very important is the infrequency of the census.

The Jamaican Census Experience in Collecting Statistics related to Disability

The Censuses of 1991 and 2001

In 1991, for the first time in Jamaica, the census was designed to capture data on disability. This was in keeping with the growing international recognition of the rights of persons with disabilities as highlighted by the United Nations declared “Decade of the Disabled Persons” (1983–1992). Many countries introduced questions aimed at collecting information on the disabled, for the first time in the 1990 round of censuses. In designing the census questions on this topic in 1991, Jamaica adopted the recommendations of the U.N. to use the ‘disability’

approach, rather than the 'impairment' or 'handicap' approach. A screening question was asked to identify persons with a disability, which limits their activities and a list of specific types were listed for scoring the answer.

The question posed in census 1991 was *"Do you suffer from any long-standing illness or disability or infirmity?"* If yes, a follow-up question asked, *"Does this limit your activities compared with people of the same age?"* If yes, then *"What type of disability or impairment do you have?"* Persons answering yes to the first two questions were identified as the disabled. The total number of persons identified on that basis was 111,114. This number represented persons in private households only. It was recognized that it was very possible that persons suffering from "long standing illnesses", and not necessarily disabilities, were included in that count.

For census 2001, particular attention was paid to the wording of the questions. The pre-testing of the questionnaire also confirmed that responses to the question in many instances focused on the illnesses. On this account the decision was taken to separate the questions. A question asked, *"Do you suffer from any long standing illness?"* and identified a number of chronic illnesses; arthritis, asthma, hypertension, heart disease, kidney disease, sickle cell disease and diabetes. A second question asked, *"Do you suffer from any disability or infirmity?"* If yes, *"Does it limit your activities compared with most people of the same age?"* If yes, *"What type of disability do you have?"*

A total of 162, 800 persons responded yes to the question, *"Do you suffer from any disability or infirmity?"* while 55.6 per cent of this number or 72,300 persons responded yes when asked *"Does it limit your activities compared with most people of the same age?"*

Beginning with the 1991 experience, it was recognized that there were important limitations in using the census as a vehicle for collecting this type of data. Apart from limitations of space on the questionnaire, to attempt to train 5,000 interviewers in the concepts and definitions relevant to this area, and then to undertake the probing that would be required is neither practical nor possible. A major limitation is related to the difficulty in covering the institutional population. Census information on persons in institutions is generally limited to age and sex which in most instances are taken from administrative records. The fact that there is still some amount of reluctance in the society to be open with disability was also apparent. The medical issues and considerations, which can arise, are best left to detailed sample surveys using specially trained interviewers. Data users have sought to use the census to obtain information regarding levels (mild, moderate, severe, profound) and detailed breakdowns on each disability type. The census cannot be the vehicle to collect such data.

The 2011 Census of Jamaica

For the 2011 census, Jamaica was guided by the recommendations of the Washington Group on Disability Statistics as proposed by the United Nations Principles and Recommendations for Population and Housing Censuses. This group was established by the United Nations Statistical Commission in 2001 as an international, consultative group of experts to facilitate the measurement of disability and the comparison of data on disability across countries. The approach proposed by the Washington Group is based on the International Classification of Functioning, Disability and Health (ICF), the successor to the International Classification of Impairments, Disabilities and Handicaps issued in by the World Health Organization in 1980.

The ICF is a classification of health and health-related domains. These domains are classified from body, individual and societal perspectives by means of two lists: a list of body functions and structure, and a list of domains of activity and participation. Since an individual's functioning and disability occurs in a context, the ICF also includes a list of environmental factors.

The ICF is WHO's framework for measuring health and disability at both individual and population levels. The ICF was officially endorsed by all 191 WHO Member States in the Fifty-fourth World Health Assembly on 22 May 2001(resolution WHA 54.21). Unlike its predecessor, which was endorsed for field trial purposes only, the ICF was endorsed for use in Member States as the international standard to describe and measure health and disability.

The ICF puts the notions of 'health' and 'disability' in a new light. It acknowledges that every human being can experience a decrement in health and thereby experience some degree of disability. Disability is not something that only happens to a minority of humanity. The ICF thus 'mainstreams' the experience of disability and recognises it as a universal human experience. By shifting the focus from cause to impact it places all health conditions on an equal footing allowing them to be compared using a common metric – the ruler of health and disability. Furthermore ICF takes into account the social aspects of disability and does not see disability only as a 'medical' or 'biological' dysfunction. By including Contextual Factors, in which environmental factors are listed ICF allows to records the impact of the environment on the person's functioning (WHO).

The Washington Group developed a short set of questions for use in censuses and surveys, consistent with the ICF. Six (6) core functional domains are recognized: seeing, hearing, walking, cognition, self-care and communication. The specific questions ask about difficulties doing certain activities because of a health problem. The response categories for the question would indicate the level of difficulty associated with the activity. The use of words like 'suffer' is discouraged.

The United Nations Principles and Recommendations for Population and Housing Censuses (for the 2010 round) recommends that "the following four (4) domains be considered essential in determining disability status in a way that can be reasonably measured using a census and that would be appropriate for international comparison:

- a) Walking;
- b) Seeing;
- c) Hearing;
- d) Cognition.

The recommendations indicate that if space permits two other domains, self-care and communication may be included. In keeping with the international recommendations therefore, the activities identified for the 2011 census were seeing, hearing, walking or climbing stairs, remembering and concentrating, self-care, lifting, reaching and carrying and communicating. The levels of difficulty to be scored were 'no difficulty,' 'some difficulty,' 'much difficulty' and 'cannot do it at all.'

An important aspect of the issue is whether in determining difficulty, consideration should be given to the use of aids. The international recommendations are that the questions relate to the level of difficulty *even with the use of aids*. For example, for someone who wears glasses the level of difficulty with the glasses for seeing is required, for someone who uses a hearing aid the level of difficulty with the aid for hearing is required and for someone who uses a walker or a walking stick, the level of difficulty with the aid for walking is required.

The question included in the 2011 Census of Jamaica:

To be asked of all persons 5 years old and older.

1.7 Do you/does ... experience difficulty doing any of the following: (Read the categories and insert a code for each that applies)

| | Level of Difficulty (Code) | Aid (Code) | Medication (Code) |
|--------------------------------|-------------------------------|---------------|----------------------|
| Seeing | | | |
| Hearing | | | |
| Walking or climbing stairs | | | |
| Remembering and concentrating | | | |
| Self-care | | | |
| Lifting, reaching and carrying | | | |
| Communicating | | | |

Explanation of Categories

Remembering and Concentrating- means remembering and concentrating even for short periods.

Self-Care - This was to be scored if the person is dependent on assistance from other people to take care of himself/herself for feeding, bathing and other types of personal care.

Lifting, reaching and carrying- This relates to cases where persons encounter difficulties with functions of the upper body.

Communicating- This refers to communication with other persons in generating, sending, receiving and understanding messages.

Due to the major differences between the questions and the concepts at each census since 1991 comparisons between the findings from each, cannot be made.

Summary of Findings

Introduction

This report on findings from the 2011 census will deliberately not attempt to identify a disabled population because of the recognized obvious deficiencies in the data collection process. This, despite the recommendation from the Washington Group that the population considered disabled should include everyone with at least one (activity) domain that is scored 'much difficulty' or 'cannot do it at all'. For this report, the findings as produced will therefore relate specifically to the questions as asked, referring to the levels of difficulty associated with the activity areas recognized.

The findings based on the questions posed will be presented in relation to two separate age groups, the 5-14 years and the 15 years and over. This is essentially because some areas of activity are considered to be more relevant to adults and even so would not be easily discernible among the younger ages. The analysis of the difficulties experienced by the 5-14 years age group will be confined to the activities of seeing, hearing, walking or climbing stairs and communicating. The activities related to the adults will include these named as well as lifting, reaching and carrying, remembering and concentrating and self-care.

The analysis is based on a population of 2,474,670 of which 2,469,178 were in private households and 5,492 in selected institutions. The institutions represent those in which the occupants were administered the entire questionnaire. Excluded are the 12,698 persons enumerated in correctional and mental institutions, homes for children the elderly, infirm and needy, homes for the handicapped, homes providing specialized care, hospices and hospitals for chronic ailments.

Table (i) presents a summary of the population totals. This table identifies the number of persons who report a level of difficulty in at least one area. The analysis which follows will however not distinguish between persons who indicated difficulties in one area only and those who indicated difficulties in more than one area. Instead, reference will be made to persons who report *any difficulty* which forms the basis for the main tables presented in the report. **It is important to note that because persons reported on difficulties in all the areas of activity, each person may be counted several times depending on the number of areas in which he/she experienced difficulties.**

For the analysis, levels of difficulty will be classified as mild and severe. Mild represents the 'some difficulty' responses while severe represents responses given as 'much difficulty' or 'cannot do it at all'.

Table (i) Summary of Responses

| Item | Total | Male | Female |
|--|------------------|------------------|------------------|
| Population 5 years and over in Selected Households* | 2,474,670 | 1,218,742 | 1,255,928 |
| Population 5-14 years | 491,391 | 250,087 | 241,304 |
| <i>Reporting No Difficulty in any</i> | <i>457,246</i> | <i>234,792</i> | <i>222,454</i> |
| <i>Reporting Difficulty in at least one</i> | <i>28,077</i> | <i>12,382</i> | <i>15,695</i> |
| <i>Of which mild</i> | <i>25,290</i> | <i>10,886</i> | <i>14,404</i> |
| <i>Of which severe</i> | <i>2,787</i> | <i>1,496</i> | <i>1,291</i> |
| Population 5-14 years Not Reporting | 6,068 | 2,913 | 3,155 |
| Population 15 years and over | 1,983,279 | 968,655 | 1,014,624 |
| <i>Reporting No Difficulty in any</i> | <i>1,510,786</i> | <i>786,771</i> | <i>724,016</i> |
| <i>Reporting Difficulty in at least one</i> | <i>450,629</i> | <i>170,820</i> | <i>279,808</i> |
| <i>Of which mild</i> | <i>419,150</i> | <i>156,093</i> | <i>263,057</i> |
| <i>Of which severe</i> | <i>31,479</i> | <i>14,728</i> | <i>16,751</i> |
| Population 15 years and over Not Reporting | 21,864 | 11,064 | 10,800 |

(*See Notes to the Tables - pg xxii, Item No. 6 for list of selected households.)

Ages 5-14 years with Difficulty in Any Area

Table (ii) shows the average number of persons of ages 5-14 years old reporting for the four activities to be about 487,000 indicating a non-response rate of about 1 per cent. The average number of males reporting was approximately 248,000 compared to 239,000 females. The data show in the first place that the overwhelming majority of persons in this age group reported no difficulties in any of the areas. For persons reporting difficulties, the data show sight as the area with the highest percentage of persons with difficulties (4 per cent). This compared with 1 per cent for hearing, 0.7 per cent for communicating and 0.6 per cent for walking or climbing stairs.

Table (ii) Population 5-14 years old Reporting by Level of Difficulty in All Activity Areas by Sex: 2011

| Activity Area | Total Reporting | Level of Difficulty | | |
|----------------------------|-----------------|---------------------|------------|---------|
| | | No Difficulty | Difficulty | |
| | | | Number | Percent |
| | BOTH SEXES | | | |
| Seeing | 487,011 | 466,964 | 20,047 | 4.12 |
| Hearing | 486,677 | 481,049 | 5,628 | 1.16 |
| Communicating | 485,923 | 482,489 | 3,434 | 0.70 |
| Walking or Climbing Stairs | 486,630 | 483,510 | 3,120 | 0.64 |
| | MALE | | | |
| Seeing | 247,979 | 239,884 | 8,095 | 3.26 |
| Hearing | 247,829 | 245,075 | 2,754 | 1.11 |
| Communicating | 247,487 | 245,473 | 2,014 | 0.81 |
| Walking or Climbing Stairs | 247,819 | 246,273 | 1,546 | 0.62 |
| | FEMALE | | | |
| Seeing | 239,032 | 227,044 | 11,988 | 5.02 |
| Hearing | 238,848 | 235,974 | 2,874 | 1.20 |
| Communicating | 238,436 | 237,016 | 1,420 | 0.60 |
| Walking or Climbing Stairs | 238,811 | 237,237 | 1,574 | 0.66 |

The sex differentials should be noted. Young females were over one and a half times more likely than young males to report difficulties related to vision and only slightly more likely than young males to report difficulties related to hearing and to walking or climbing stairs. About 5 per cent of the females reported some level of difficulty in seeing. The comparative percentage for young males was 3 per cent. For hearing and walking or climbing stairs the percentage of females reporting difficulties was 1 per cent and 0.7 per cent respectively, compared to 1 per cent and 0.6 per cent respectively for males. Speech-related difficulties were slightly more common among young males with a prevalence rate of 0.8 per cent compared to 0.6 per cent among females.

Data in respect of the severity of the difficulties are summarized in table (iii). The table shows the distribution for levels classified as mild and severe for each activity area. The overwhelming majority of cases were reported as mild, ranging from a high of 93 per cent for young persons reporting vision problems to 67 per cent for speech related problems. Conversely, the highest rates for severe cases are seen for the speech related (33 per cent) and mobility (30 per cent) difficulties.

Table (iii) Population 5-14 years old Reporting Difficulty in Any Activity Area by Level of Difficulty by Sex: 2011

| Activity Area | Total Reporting Difficulty | Level of Difficulty | |
|----------------------------|----------------------------|---------------------|-----------------|
| | | Per cent Mild | Per cent Severe |
| | BOTH SEXES | | |
| Seeing | 20,047 | 93.41 | 6.59 |
| Hearing | 5,628 | 88.66 | 11.34 |
| Communicating | 3,434 | 66.77 | 33.23 |
| Walking or Climbing Stairs | 3,120 | 70.45 | 29.55 |
| | MALE | | |
| Seeing | 8,059 | 92.48 | 7.52 |
| Hearing | 2,754 | 87.29 | 12.71 |
| Communicating | 2,014 | 66.09 | 33.91 |
| Walking or Climbing Stairs | 1,546 | 67.46 | 32.54 |
| | FEMALE | | |
| Seeing | 11,988 | 94.04 | 5.96 |
| Hearing | 2,874 | 89.98 | 10.02 |
| Communicating | 1,420 | 67.75 | 32.25 |
| Walking or Climbing Stairs | 1,574 | 73.38 | 26.62 |

An examination of the sex differential for the severe cases shows that rates were higher for males in all activity areas. The prevalence of a severe level of difficulty seeing or hearing was about 1.3 times higher for young men than young women. Among young males 8 per cent of the sight-related difficulties and 13 per cent of difficulties related to hearing were severe, compared to 6 per cent and 10 per cent respectively for the severe cases for these activities among young women.

Age 15 years and over with Difficulty in any Area

The number of persons of this age group reporting on the 7 activities averaged 1,969,000 with an average number of men 961,000 and women 1,008,000 (table (iv)). Problems related to sight were the type most often reported by adults in 2011. A total of 348,163 persons, about 18 per cent of the numbers reporting, reported some level of difficulty. This was followed by difficulties of mobility. About 123,000 persons aged 15 years old and over (6 per cent), had difficulty walking or climbing stairs and 92,600 (5 per cent) had difficulty lifting reaching or carrying. Over 70,000 persons reported difficulties remembering and concentrating, more than the number with hearing problems (approximately 62,000).

Table (iv) Population 15 years Old and Over Reporting by Level of Difficulty in Activity Areas by Sex: 2011

| Activity Area | Total Reporting | Level of Difficulty | | |
|--------------------------------|-----------------|---------------------|------------|---------|
| | | No Difficulty | Difficulty | |
| | | | Number | Percent |
| | BOTH SEXES | | | |
| Seeing | 1,970,739 | 1,622,576 | 348,163 | 17.7 |
| Hearing | 1,969,515 | 1,900,286 | 69,229 | 3.5 |
| Communicating | 1,968,499 | 1,933,499 | 35,000 | 1.8 |
| Walking or Climbing Stairs | 1,969,945 | 1,847,178 | 122,767 | 6.2 |
| Lifting, Reaching and Carrying | 1,966,576 | 1,873,998 | 92,578 | 4.7 |
| Remembering and Concentrating | 1,967,369 | 1,894,743 | 72,626 | 3.7 |
| Self-Care | 1,969,086 | 1,907,147 | 61,939 | 3.1 |
| | MALE | | | |
| Seeing | 962,136 | 840,550 | 121,586 | 12.64 |
| Hearing | 961,593 | 932,973 | 28,620 | 2.98 |
| Communicating | 960,155 | 943,427 | 16,728 | 1.74 |
| Walking or Climbing Stairs | 961,420 | 916,553 | 44,867 | 4.67 |
| Lifting, Reaching and Carrying | 960,393 | 923,750 | 36,643 | 3.82 |
| Remembering and Concentrating | 961,205 | 933,272 | 27,933 | 2.91 |
| Self-Care | 960,960 | 942,366 | 18,594 | 1.93 |
| | FEMALE | | | |
| Seeing | 1,008,603 | 782,026 | 226,577 | 22.46 |
| Hearing | 1,008,352 | 967,743 | 40,609 | 4.03 |
| Communicating | 1,006,694 | 988,417 | 18,277 | 1.82 |
| Walking or Climbing Stairs | 1,008,095 | 930,195 | 77,900 | 7.73 |
| Lifting, Reaching and Carrying | 1,006,976 | 948,861 | 58,115 | 5.77 |
| Remembering and Concentrating | 1,007,881 | 963,188 | 44,693 | 4.43 |
| Self-Care | 1,007,539 | 982,788 | 24,751 | 2.46 |

Women were more likely than men to have difficulties in all areas. There was a considerable difference in the percentage of women (22 per cent) and men (13 per cent) with difficulties related to vision. The second highest differentials between men and women observed were in respect of walking (or climbing stairs) difficulties with 8 per cent of women reporting difficulties in this area, compared to 5 per cent of men. A slightly higher percentage of women (4 per cent) than of men (3 per cent) reported hearing difficulties. Activity limitations related to lifting, reaching or carrying were more common among women (6 per cent) than men (4 per cent) as were those related to remembering and concentrating and self-care (women 4 per cent and 3 per cent respectively) compared to men (3 per cent and 2 per cent respectively).

The relationship between limitations and age for persons 15 years old and over, experiencing difficulties in any area is the subject of table (v).

Table (v) Population 15 years Old and Over Reporting by Level of Difficulty in Activity Areas by Specific Age Groups and Sex: 2011

| Activity and Age Group | Total Reporting | Per cent With Difficulty | Total Reporting | Per cent With Difficulty |
|---------------------------------------|-----------------|--------------------------|------------------|--------------------------|
| | MALE | | FEMALE | |
| Seeing | 962,136 | 12.64 | 1,008,603 | 22.46 |
| 15-44 | 625,039 | 4.48 | 654,612 | 10.58 |
| 45-64 | 238,064 | 21.60 | 238,373 | 38.86 |
| 65-74 | 56,424 | 35.58 | 58,658 | 51.22 |
| 75+ | 42,609 | 51.81 | 56,960 | 60.77 |
| Hearing | 961,593 | 2.98 | 1,008,352 | 4.03 |
| 15-44 | 624,546 | 0.97 | 654,271 | 1.34 |
| 45-64 | 237,993 | 2.62 | 238,426 | 3.65 |
| 65-74 | 56,426 | 9.39 | 58,673 | 10.87 |
| 75+ | 42,628 | 25.87 | 56,982 | 29.48 |
| Communicating | 959,882 | 1.74 | 1,006,694 | 1.82 |
| 15-44 | 623,624 | 1.10 | 653,144 | 0.80 |
| 45-64 | 237,363 | 1.74 | 238,046 | 1.61 |
| 65-74 | 56,341 | 3.18 | 58,586 | 3.61 |
| 75+ | 42,554 | 9.31 | 56,918 | 12.53 |
| Walking or Climbing Stairs | 961,420 | 4.67 | 1,008,095 | 7.73 |
| 15-44 | 624,439 | 1.21 | 654,104 | 1.74 |
| 45-64 | 237,962 | 5.04 | 238,383 | 9.72 |
| 65-74 | 56,402 | 16.57 | 58,648 | 25.85 |
| 75+ | 42,617 | 37.50 | 56,960 | 49.49 |
| Lifting, Reaching and Carrying | 960,393 | 3.82 | 1,006,976 | 5.77 |
| 15-44 | 623,757 | 1.16 | 653,371 | 1.55 |
| 45-64 | 237,709 | 3.97 | 238,109 | 6.45 |
| 65-74 | 56,360 | 11.96 | 58,574 | 17.77 |
| 75+ | 42,567 | 31.13 | 56,922 | 38.98 |
| Remembering and Concentrating | 961,205 | 2.91 | 1,007,881 | 4.43 |
| 15-44 | 624,323 | 1.42 | 653,977 | 1.55 |
| 45-64 | 237,894 | 2.84 | 238,309 | 4.97 |
| 65-74 | 56,395 | 7.25 | 58,645 | 11.63 |
| 75+ | 42,593 | 19.26 | 56,950 | 27.88 |
| Self-Care | 960,960 | 1.93 | 1,007,539 | 2.46 |
| 15-44 | 624,147 | 0.67 | 653,716 | 0.58 |
| 45-64 | 237,836 | 1.60 | 238,255 | 1.82 |
| 65-74 | 56,385 | 5.00 | 58,621 | 5.93 |
| 75+ | 42,592 | 18.24 | 56,947 | 23.07 |

The table presents the population reporting difficulties in each age group as a percentage of the total persons in each age group, who reported. The table shows that the incidence of difficulties rose increasingly with age with the highest rate seen for the oldest age group, the 75 years and over for each activity. For example, with fewer than 5 per cent of persons reporting sight related difficulties among the young men aged 15-44 years and 11 per cent among young women of similar age, the rate reached 52 per cent for men and 61 per cent for women at age 75 years and over. For walking, the rate for men rose from 1.2 per cent among the 15-44 years to 38 per cent for the 75 years and over. The comparative movement for women reporting difficulties of walking was from 1.7 per cent to 49 per cent. The rates were in general higher for women at all ages with the exception of the 15-44 years and 45-64 years with speech related difficulties. In these cases the rates were higher for men at 1.1 per cent and 1.7 per cent compared to 0.8 per cent and 1.6 per cent for women respectively in the age groups.

Level of Severity

The data in respect of level of difficulty, mild or severe for adults with a difficulty in any of the areas identified for the age group 15 years and over, are presented in table (vi). As for the children, the majority of cases in all areas are classified as mild as the response indicated 'some difficulty' rather than 'much difficulty' or cannot do it at all'. Mild rates ranged from the lowest, 64 per cent for self-care to the highest, 91 per cent for sight-related difficulties. Conversely, the highest rate for severe cases was observed for self-care (36 per cent) and the lowest, 9 per cent, for sight. More than a quarter (27 per cent) of the adult population reporting problems related to lifting and communication may be classified as severe.

An examination of the sex differentials related to severity shows higher rates for men in all activities. Severe memory problems were more common among adult men (21 per cent) compared to adult women (17 per cent), as were speech - related problems (29 per cent), compared to 25 per cent for women.

**Table (vi) Population 15 years Old and Over Reporting Difficulty in Any Activity
Area by Level of Difficulty by Sex: 2011**

| Activity Area | Total Reporting | Level of Difficulty | | | |
|--------------------------------|-----------------|---------------------|---------|--------|---------|
| | | MILD | | SEVERE | |
| | | Number | Percent | Number | Percent |
| BOTH SEXES | | | | | |
| Seeing | 348,163 | 315,280 | 90.56 | 32,863 | 9.44 |
| Hearing | 69,229 | 57,950 | 83.71 | 11,279 | 16.29 |
| Communicating | 35,005 | 25,573 | 73.06 | 9,432 | 26.94 |
| Walking or Climbing Stairs | 122,767 | 94,416 | 76.91 | 18,351 | 14.95 |
| Lifting, Reaching and Carrying | 94,758 | 68,982 | 72.80 | 25,776 | 27.20 |

| Self-Care | 43,345 | 27,797 | 64.13 | 15,550 | 35.87 |
| | MALE | | | | |
| Seeing | 121,586 | 108,600 | 89.32 | 12,986 | 10.68 |
| Hearing | 28,620 | 23,741 | 82.95 | 4,879 | 17.05 |
| Communicating | 16,728 | 11,916 | 71.23 | 4,812 | 28.77 |
| Walking or Climbing Stairs | 44,867 | 33,635 | 74.97 | 11,232 | 25.03 |
| Lifting, Reaching and Carrying | 36,643 | 26,371 | 71.97 | 10,272 | 28.03 |
| Remembering and Concentrating | 27,933 | 22,085 | 79.06 | 5,848 | 20.94 |
| Self-Care | 18,594 | 11,902 | 64.01 | 6,692 | 35.99 |
| | FEMALE | | | | |
| Seeing | 226,577 | 206,680 | 91.22 | 19,877 | 8.77 |
| Hearing | 40,609 | 34,209 | 84.24 | 6,400 | 15.76 |
| Communicating | 18,277 | 13,657 | 74.72 | 4,620 | 25.28 |
| Walking or Climbing Stairs | 77,900 | 60,781 | 78.02 | 17,119 | 21.98 |
| Lifting, Reaching and Carrying | 58,115 | 42,611 | 73.32 | 15,504 | 26.68 |
| Remembering and Concentrating | 44,693 | 37,317 | 83.50 | 7,376 | 16.50 |
| Self-Care | 24,751 | 15,895 | 64.22 | 8,858 | 35.79 |

The gradual increase in rates which occurred with age has been discussed. Table (vii) shows that the increase was evident for both mild and severe cases. Rates of severity were highest for the oldest, age 75 years and over. The highest rates at age 75 years and over for persons who had severe difficulties were those related to self-care; 42 per cent for women and 40 per cent for men.

**Table (vii) Population 15 years Old and Over Reporting Difficulty in Any Activity
Area by Specific Age Group and Level of Difficulty by Sex: 2011**

| Activity and Age Group | Number Reporting Difficulty | Per cent Mild | Per cent Severe | Number Reporting Difficulty | Per cent Mild | Per cent Severe |

Notes to the Tables

1. Summary of Population Counts:
 - (i) Population in private dwellings identified from manual records: 2,553,949
 - (ii) Population enumerated in Institutions: 18,420
 - (iii) Population enumerated on the streets: 934
 - (iv) Total population identified from manual records: 2,573,303
 - (v) Number of dwellings identified as occupied but no contact made with residents: 97,000
 - (vi) Population completing questionnaire: 2,214,341
 - (vii) Final population count adjusted for undercount: 2,697, 983
2. **The tables in this report are based on the adjusted data.** The adjustments were guided by the use of standard demographic analysis based on the 2001 census count and vital statistics for the intercensal period. This was supplemented in part by findings of the Post Enumeration Survey conducted immediately following the main enumeration.
3. **Adjustment factors based on age and sex for each parish have been applied to the enumerated population.**
4. **Adjustment factors are calculated to 5 decimal places. The final adjusted figures are rounded to the nearest ten.**
5. **Rounding may cause minor discrepancies between totals and the sums of the component parts of a table.**
6. The census tabulations are based on different population groups, determined by the questions posed to these groups. The tabulations on the disability indicators are based on a total population of **2,474,670** representing persons 5years old and over in private dwellings and the following institutions:
 - Convents and Monasteries
 - University and College Residences
 - Hostels and Residences for Trainees and/or Graduate Teachers, Nurses and Ministers of Religion
 - Military Camps, Police Training Schools and Police Barracks
 - Boarding Schools and Other Residential Schools

Summary Tables

Table 1.1

Population 5 Years Old and Over by Level of Difficulty related to Sight by Sex and Age Group

| Age Group | Total | Level of Difficulty | | | | |
|-------------------|------------------|---------------------|-----------------|-----------------|---------------------|--------------|
| | | No Difficulty | Some Difficulty | Much Difficulty | Cannot Do It At All | Not Reported |
| Males | 1,218,742 | 1,080,470 | 116,053 | 10,219 | 3,373 | 8,627 |
| 5-14 years | 250,087 | 239,920 | 7,453 | 501 | 105 | 2,108 |
| 15-24 years | 263,334 | 252,020 | 8,574 | 565 | 145 | 2,030 |
| 25-34 years | 195,565 | 186,699 | 6,761 | 470 | 130 | 1,505 |
| 35-44 years | 170,601 | 158,310 | 10,679 | 535 | 151 | 926 |
| 45-54 years | 145,291 | 117,419 | 25,345 | 1,168 | 207 | 1,152 |
| 55-64 years | 94,393 | 69,221 | 22,945 | 1,416 | 343 | 468 |
| 65-74 years | 56,662 | 36,347 | 17,474 | 2,031 | 572 | 238 |
| 75 years and over | 42,809 | 20,534 | 16,822 | 3,533 | 1,720 | 200 |

PC 011A

3.9 What type of toilet facilities does this household have?

- ☐ WC Linked to Sewer
- ☐ WC not Linked to Sewer
- ☐ Pit
- ☐ Other (Specify)_____
- ☐ None (Go to Q3.11)
- ☐ Not Stated

3.10 Are the facilities shared with another household?

- ☐ Shared ☐ Not Shared ☐ Not Stated

3.11 What does this household use most for lighting?

- ☐ Electricity ☐ Other (Specify) _____
☐ Kerosene ☐ Not Stated

3.12 What type of fuel does this household use most for cooking?

- ☐ LPG ☐ Biogas
☐ Electric ☐ Solar Energy
☐ Wood ☐ No Cooking Done
☐ Charcoal ☐ Other (Specify) ____
☐ Kerosene ☐ Not Stated

3.13 How does this household obtain water for domestic purposes? (Score the main one)

- ☐ Public piped into dwelling
- ☐ Public piped into yard
- ☐ Private piped into dwelling
- ☐ Private Catchment, not piped
- ☐ Public Standpipe
- ☐ Public Catchment
- ☐ Spring or River
- ☐ Trucked water/water truck
- ☐ Other (Specify) _____
- ☐ Not Stated

3.14 What 'type' of water is used for drinking in this household? (Score the main one)

- ☐ Bottled ☐ Other-Treated
☐ Piped-Treated ☐ Other-Not Treated
☐ Piped-Not Treated ☐ Not Stated

3.15 What is the main method of garbage disposal for this household?

- ☐ Regular Public Collection System
- ☐ Irregular Public Collection System
- ☐ Private Collection System
- ☐ Burn
- ☐ Bury
- ☐ Dumping in Sea/River/Pond/Gully
- ☐ Dumping in Own Yard
- ☐ Dumping in Municipal Site
- ☐ Other Dumping
- ☐ Other Method of Disposal
- ☐ Not Stated

3.16 Is there a telephone in this household?
(One answer only)

- ☐ Fixed Cellular or Landline only ☐ None
☐ Mobile Cellular only ☐ Not Stated
☐ Both Fixed & Mobile

3.17 Are there any of the following communication devices in this household? (Score for each one)

| | Yes | No | Not Stated |
|--------------------------|-----------------------|-----------------------|-----------------------|
| Radio | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| Television | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |
| Personal Computer/Laptop | <input type="radio"/> | <input type="radio"/> | <input type="radio"/> |

**ASK Q 3.18 ONLY IF PERSONAL
COMPUTER/LAPTOP IS SCORED YES AT Q 3.17 ▼**

3.18 Is there an Internet connection to this computer?

- ☐ Yes-Dial up ☐ No
☐ Yes-Broadband ☐ Not Stated
☐ Other (Specify) _____
